PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided **AWS** and **Azure** cloud event monitoring, triaging over 500 security alerts weekly and escalating critical findings to incident response teams.
- Tuned existing **Splunk** alerts for cloud environments, reducing false positive rates by **30%** and improving the signal-to-noise ratio for security investigations.
- Analyzed cloud logs using **Splunk** and **Azure Log Analytics** to identify suspicious **AI utilization** patterns and potential jailbreak attempts across managed services.
- Collaborated with incident response and vulnerability management teams to triage and report critical cloud vulnerabilities discovered in **AWS** and **Azure**.
- Updated and maintained documentation for cloud security tooling and environmental changes, ensuring accurate reference for operational procedures.
- Developed **Python** scripts to automate the collection and initial analysis of cloud security logs, reducing manual review time by approximately **15%** per shift.
- Containerized and deployed security monitoring agents to **AWS EC2** instances using **Docker**, ensuring consistent and scalable operational presence.

SKILLS

Cloud Platforms – AWS, Azure, GCP

Security Tools – Splunk, Azure Security Center, AWS Cloud Security Hub, Log Analytics

Security Concepts – Incident Response, Threat Analysis, Vulnerability Management, Information Security Principles, Data Protection Frameworks

Automation & Scripting – Python, Shell Scripting

Cloud Services – EC2, S3, Lambda, CloudWatch

DevOps Tools – Docker, Jenkins, Git

Standards & Frameworks – CIS, NIST, MITRE, ITIL, GDPR, ISO 27001

PROJECTS

Cloud Security Monitoring and Triage Automation

- Developed a **Python**-based automation script to ingest and pre-process cloud security logs from **AWS CloudTrail** and **Azure Activity Logs** into a centralized Splunk index.
- Implemented alert dispositioning logic within the script to categorize incoming events, automatically closing low-fidelity alerts and flagging high-priority incidents for analyst review, reducing manual triage time by **20%**.
- Integrated the script with a **Jira** ticketing system to create actionable tickets for critical security events, including details on affected resources and initial analysis findings.

Cloud Vulnerability Assessment and Reporting

- Conducted regular vulnerability assessments across **AWS** and **Azure** environments using native security services and custom queries in **Splunk**.
- Authored detailed reports on identified cloud vulnerabilities, including risk assessment, potential impact, and recommended remediation steps, which were presented to enterprise security stakeholders.
- Collaborated with cloud engineering teams to track remediation progress and verify the effectiveness of security patches and configuration changes.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
