PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and implemented systems for **NPC AI** and general gameplay features for AAA titles, ensuring high-performance and well-documented code.
- Integrated and enhanced **UI systems** within the game engine, contributing to a fluid and intuitive user experience across multiple platforms.
- Wrote and optimized **C++ code** for game systems, focusing on efficient memory management and execution speed to meet performance targets on PC and consoles.
- Collaborated with art and design teams to provide engineering support, translating their creative requirements into functional game mechanics and systems.
- Debugged and resolved complex issues across various game systems, utilizing **profiling and debugging tools** to identify root causes and implement robust solutions.
- Managed code versions and reported defects using **source control (Git)** and bug tracking software, adhering to team workflows and project timelines.
- Deployed and tested game features on **PC and console** environments, participating in release cycles and validating functionality against quality standards.

SKILLS

Languages – C++, Python, C#, Groovy

Engines & Frameworks – Unreal Engine

Core Concepts – NPC AI, Gameplay Systems, UI Development, 3D Mathematics, Source Control, Bug Reporting

Tools – Debugging Tools, Profiling Tools

Methodologies – Agile Development

PROJECTS

AAA Gameplay Feature Implementation (Unreal Engine)

- Engineered and integrated a complex **NPC AI behavior system** within Unreal Engine, enabling dynamic pathfinding and reactive decision-making for non-player characters.
- Developed a suite of **UI components** using Unreal Engine's UMG system, including health bars, inventory screens, and dialogue interfaces, ensuring seamless integration with gameplay.
- Contributed to the overall game architecture by implementing core gameplay mechanics in **C++**, focusing on modularity and adherence to design specifications for AAA titles.

Custom Engine Gameplay Systems

- Implemented core **gameplay systems** in a custom engine environment, demonstrating adaptability to diverse technical stacks and engine architectures.
- Developed and refined **AI logic** for enemy encounters, incorporating state machines and threat assessment to create challenging and engaging combat scenarios.
- Utilized **Python scripting** for rapid prototyping and tool development to assist the design team in iterating on gameplay mechanics and level design.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
