## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for backend operations, handling core business logic and integrating with upstream and downstream systems.
- Engineered and maintained data processing pipelines using **Python** and **pandas**, automating ETL tasks and generating scheduled reports for operational analysis.
- Designed and implemented RESTful APIs in **Java Spring Boot**, facilitating inter-service communication and enabling seamless data exchange across enterprise platforms.
- Supported and enhanced enterprise business systems, including ERP modules, by coordinating change management processes and performing post-go-live analysis.
- Managed production environments for financial-services client applications, focusing on incident response, SLA adherence, and log analysis using **Splunk** and **Dynatrace**.
- Collaborated with cross-functional teams, including business analysts and operations, to gather requirements, support UAT, and triage issues for system enhancements.
- Containerized applications using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and managing cloud infrastructure.

## SKILLS

**Languages** – Java, Python, SQL, R

**Frameworks/Libraries** – Spring Boot, pandas, NumPy, scikit-learn, Hibernate, JPA

**Databases** – PostgreSQL, MySQL, Oracle

**Cloud/DevOps** – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

**BI/Analytics** – Power BI, Tableau, DAX, Power Query, RStudio

**Tools/Platforms** – Jira, Confluence, Splunk, Dynatrace, Linux

## PROJECTS

### Financial Operations Data Aggregation Platform (HCL Technologies)

- Developed a **Python**-based ETL pipeline to ingest and transform transaction data from multiple sources, aggregating operational metrics for a financial-services client dashboard.
- Implemented robust error handling and logging mechanisms within the data pipeline, ensuring data integrity and providing clear audit trails for processed financial transactions.
- Designed and implemented database schema changes in **PostgreSQL** to support new data ingestion requirements, improving query performance for downstream reporting.

### Enterprise System Integration Layer (HCL Technologies)

- Built and maintained **Java Spring Boot** REST APIs to integrate disparate enterprise systems, including ERP modules and operational platforms, enabling data synchronization.
- Collaborated with client-side business analysts to define API contracts and data mapping rules, ensuring accurate data flow between interconnected systems.
- Managed the deployment of integration services using **Jenkins** CI/CD pipelines, contributing to the smooth operation of cross-system workflows.

## EDUCATION

### M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

### B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
