PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for internal microservices, handling approximately **2,100 requests per minute** during peak loads.
- Implemented efficient data persistence logic using **Hibernate** and **JPA**, managing complex object-relational mappings for core application entities.
- Authored comprehensive unit tests using **JUnit** and **Mockito**, achieving over **85% code coverage** for critical backend modules.
- Collaborated in daily **Scrum ceremonies**, contributing to sprint planning, task estimation, and daily stand-ups for a 6-person engineering team.
- Refactored legacy codebases to improve performance and reduce technical debt, leading to a measurable reduction in **API response times by 18%**.
- Containerized backend services using **Docker**, defining multi-stage builds and optimizing image sizes for efficient deployment to cloud environments.
- Participated in code reviews for junior developers, providing constructive feedback and ensuring adherence to established **OOP principles** and design patterns.

SKILLS

Frontend – TypeScript, Angular, React, Node.js, NPM, HTML, CSS

Backend – Java, Spring Boot, C#, .NET Core, Kotlin, Dependency Injection, Inversion of Control, REST APIs

Database – MySQL, PostgreSQL, Oracle, SQL

Mobile – Swift, SwiftUI, SwiftPM, UIKit, Core Data

DevOps & Cloud – AWS, Docker, Kubernetes, Git, Jenkins, CI/CD

General CS – Object-Oriented Programming, Software Design Patterns, Data Structures, Algorithms

PROJECTS

Java Microservice for Real-Time Data Ingestion

- Engineered a **Java Spring Boot** microservice to process and ingest high-volume data streams, handling approximately **1,500 events per second**.
- Implemented robust error handling and retry mechanisms using **JPA** with a **PostgreSQL** backend, ensuring data integrity during transient network issues.
- Containerized the application using **Docker** and integrated it into a CI/CD pipeline managed by **Jenkins** for automated testing and deployment.

Customer Order Management System Backend

- Developed backend logic for a customer order management system using **Spring Boot**, focusing on maintainable code and clear RESTful API design.
- Integrated with a **MySQL** database to manage order data, including product details, customer information, and shipping status.
- Wrote unit and integration tests with **JUnit** to validate business logic and API endpoints, contributing to a stable and reliable system.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
