PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented Python-based automation scripts for data pipeline ETL processes, reducing manual data processing time by approximately **40%**.
- Developed and maintained **Java Spring Boot** REST APIs for cross-service data exchange, ensuring robust error handling and request validation.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, focusing on SLA adherence and P1/P2 incident response within a financial-services context.
- Contributed to the architecture and development of modern storage platform capabilities, participating across the full software development lifecycle including testing and continuous delivery.
- Authored detailed technical designs and comprehensive documentation for new features and system improvements within the ObjectScale platform.
- Engaged in discovery tasks and proof-of-concept development exploring modern networking solutions relevant to storage platforms.
- Containerised services using **Docker** and deployed to **AWS EC2** instances, managing configurations and basic resource allocation within the cloud environment.

SKILLS

Languages – Python, Java, C, SQL, R

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

Databases – PostgreSQL, MySQL, Oracle

Tools & Platforms – Splunk, Dynatrace, Jira, Confluence, Power BI, Tableau

Concepts – Object-Oriented Programming, REST APIs, CI/CD, Agile/Scrum, Data Analytics, Machine Learning Fundamentals, Storage Systems, Networking

PROJECTS

Distributed Storage System Data Pipeline Orchestration

- Engineered a **Python**-based orchestration layer using **Airflow** to manage complex data ingestion and transformation pipelines for a distributed storage system, handling approximately **5,000** data feeds daily.
- Developed **REST APIs** with **FastAPI** to expose pipeline status and metadata, enabling monitoring and integration with upstream enterprise systems.
- Implemented data validation checks and error handling mechanisms within the pipelines, improving data integrity for downstream analytics and reporting.

Linux Kernel Module Development for Network Monitoring

- Developed and tested **C** code for a custom **Linux kernel module** to capture and log network traffic statistics at a low level, providing insights into network performance.
- Implemented basic packet filtering and data aggregation within the kernel module to focus on specific network protocols relevant to storage system communication.
- Integrated module output with **syslog** for centralized log analysis, aiding in the debugging of network-related performance issues on enterprise servers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
