PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, implementing RESTful APIs for core platform functionalities and integrating with downstream services.
- Engineered **JPA** and **Hibernate** data access layers for enterprise applications, optimizing complex SQL queries and managing database schema evolutions across multiple relational databases.
- Designed and implemented object-oriented solutions using **Java EE** principles and **JUnit** for unit testing, ensuring code quality and adherence to design patterns within a high-availability production environment.
- Implemented **LLM-powered agent** orchestration logic using **OpenAI specs** and **MCP**, defining tool schemas and managing client/server interactions for automated workflows.
- Built APIs and event-driven pipelines for agent requests, incorporating **RAG** techniques for context assembly and implementing streaming for result delivery to end-users.
- Integrated with **GitHub** webhooks and APIs to automate CI/CD processes, including PR review bot functionalities and build status reporting.
- Deployed containerized Java applications to **AWS EC2** instances using **Docker**, configuring basic resource limits and monitoring performance with **CloudWatch**.

SKILLS

Languages – Java, Python, SQL, R

Frameworks/Libraries – Spring Boot, JPA, Hibernate, Flask, FastAPI, pandas, NumPy, scikit-learn

AI/ML – LLMs, OpenAI specs, MCP, RAG, Embeddings, Claude models

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, GitHub Actions

Databases – PostgreSQL, MySQL, Oracle

Tools – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau

PROJECTS

LLM Agent for Code Review Automation

- Developed a **Java Spring Boot** service that integrates with **GitHub** webhooks to trigger automated code reviews using **Claude** models.
- Implemented agent logic to process pull request diffs, generate natural language feedback on code style and potential issues, and comment directly on the PR.
- Designed the API contract and configuration management for the agent, enabling easy deployment and integration into existing developer workflows.

Transaction Processing Anomaly Detection

- Engineered Python scripts to extract and transform transaction data from PostgreSQL, creating features for anomaly detection models.
- Trained a **scikit-learn** classifier on a dataset of ~1.5 million transactions to identify suspicious activity, achieving an **AUC of 0.89** on a held-out test set.
- Built a **FastAPI** endpoint to serve model predictions, processing ~50 requests per second with a p95 latency under 200ms.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
