PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Maintained and monitored **enterprise applications** using **Splunk** and **Dynatrace**, ensuring adherence to service level agreements for P1/P2 incidents.
- Automated routine tasks and data processing workflows using **Python scripting**, developing ETL processes for scheduled reporting.
- Developed and debugged **Java Spring Boot** REST APIs, implementing new features and resolving defects in existing microservices.
- Managed system configuration changes through formal change-control processes, coordinating UAT and providing post-go-live support for interconnected enterprise systems.
- Executed Planned Preventative Maintenance (PPM) on various mechanical and electrical systems within a large facility, focusing on minimizing operational downtime.
- Responded to and resolved urgent breakdown requests for facility equipment, employing hand and power tools safely and efficiently.
- Operated and maintained basic workshop machinery including **lathes** and **mills**, adhering strictly to health & safety protocols.

SKILLS

Maintenance & Operations – Planned Preventative Maintenance (PPM), Breakdown Maintenance, Health & Safety Procedures, Workshop Machinery, Hand Tools, Power Tools, Access Equipment

Mechanical & Electrical – Mechanical Systems, Electrical Systems, Electronic Systems, Compressor Maintenance, AHU Maintenance, Air Conditioning Maintenance

IT & Systems – Linux, Shell Scripting, Cron Jobs, Jira, Confluence, Change Management, Record Keeping, Audits

Software Engineering – Java, Spring Boot, REST APIs, Python Scripting, SQL, PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Monitoring & Support – Splunk, Dynatrace, CloudWatch, Incident Response, SLA Management

PROJECTS

Facility Systems Monitoring and Automation

- Developed Python scripts to automate the collection of performance metrics from facility equipment, integrating with **Splunk** for dashboard visualization.
- Implemented automated alerts for critical system failures within the building management system, reducing response times by an average of **20%**.
- Created shell scripts for routine log analysis on Linux servers managing facility control systems, identifying potential issues before they impacted operations.

Automated Maintenance Reporting Tool

- Built a Python application to aggregate data from maintenance logs and work orders, generating weekly summary reports for management.
- Designed and implemented a simple relational database schema using **PostgreSQL** to store maintenance task details and historical performance data.
- Integrated the reporting tool with a notification service to automatically distribute reports to stakeholders via email.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
