PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **REST APIs** using **Java Spring Boot** for internal service communication, handling approximately **1,500 requests per minute**.
- Engineered and maintained **Python scripts** to automate data extraction and transformation tasks for scheduled reporting, reducing manual effort by an estimated **10 hours per week**.
- Resolved production incidents for enterprise applications, including P1/P2 escalations, and implemented monitoring alerts using **Splunk** and **Dynatrace** to improve system observability.
- Contributed to the design and implementation of **full-stack applications** using **Python** for the backend and **React.js** for the frontend, focusing on **agent communication** and data exchange.
- Developed **real-time features** for agent monitoring and performance tracking, ensuring efficient **data logging** and immediate feedback loops within the application.
- Collaborated within an **agile delivery** environment, participating in daily stand-ups, sprint planning, and contributing to **DevOps** practices for iterative development and deployment.
- Containerized microservices using **Docker** and deployed them to **AWS EC2** instances, configuring basic resource limits and network settings for predictable performance.

SKILLS

Backend Development – Python, Java, Spring Boot, REST APIs, Microservices, Flask, FastAPI

Frontend Development – React.js, Angular, HTML, CSS, JavaScript

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle, SQL

DevOps & CI/CD – Jenkins, Git, Jira, Confluence

Data & Analytics – Power BI, Tableau, R/RStudio, pandas, NumPy, scikit-learn, DAX, Power Query

Other – Linux, Shell Scripting, Agile Methodologies

PROJECTS

Python-based Data Ingestion Service

- Developed a **Python service** to ingest and process data streams from multiple sources into a centralized data store, handling approximately **2,000 events per second** during peak loads.
- Implemented robust error handling and retry mechanisms using **FastAPI**, ensuring data integrity and minimizing data loss in the event of downstream service disruptions.
- Wrote comprehensive unit and integration tests using **pytest**, achieving over **90% code coverage** for critical data processing modules.

React Customer Interaction Dashboard

- Built an interactive **React.js dashboard** to visualize customer interaction data and agent performance metrics, designed for real-time updates and user-friendly navigation.
- Integrated with backend **REST APIs** to fetch and display dynamic data, including agent activity status, call logs, and performance statistics, supporting a team of **15 agents**.
- Implemented state management using **Context API** and designed reusable UI components to ensure a consistent and maintainable frontend architecture.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
