PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented scalable, event-driven services in **Java Spring Boot**, processing approximately 5,000 transactions per second during peak loads for an enterprise financial dashboard.
- Developed and maintained **Hibernate** mappings and JPA entities for a PostgreSQL database, ensuring data integrity and efficient querying across multiple application modules.
- Authored comprehensive unit and integration tests using **JUnit** and Mockito, achieving over 85% code coverage for new Java Spring Boot microservices.
- Contributed to system design discussions and technical estimations during sprint planning, focusing on enhancing the reliability and scalability of real-time trading systems.
- Collaborated with Quant and Product teams to translate business requirements into technical solutions for new feature development, ensuring alignment with the product roadmap.
- Participated in code reviews, providing constructive feedback to peers to uphold code quality standards and facilitate knowledge sharing within the engineering team.
- Containerized microservices using **Docker** and deployed them to an **AWS EKS** cluster, managing configurations and resource allocation for improved operational efficiency.

SKILLS

Backend Development – Java, Spring Boot, Hibernate, JPA, REST APIs, Microservices, JUnit, Mockito, Maven

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch, EKS), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle, SQL

Scripting & Automation – Python, Shell Scripting

Methodologies & Tools – Agile, Scrum, CI/CD, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

System Design – Domain Driven Design (DDD), Event-Driven Architecture, SOLID, DRY, TDD, BDD

PROJECTS

Real-Time Trading System Enhancements (HCL Technologies)

- Developed low-latency Java microservices using Spring Boot to process and enrich trading data streams, integrating with a **PostgreSQL** backend for state management.
- Implemented asynchronous event handling with Kafka to decouple services, improving system resilience and reducing the impact of downstream failures on core trading operations.
- Wrote **JUnit** tests and performance benchmarks for critical trading logic modules, ensuring adherence to strict latency requirements and system stability.

Customer Onboarding Automation for Financial Services Platform

- Engineered Python scripts to automate the initial data ingestion and validation process for new financial services clients, reducing manual effort by approximately 40%.
- Built a **FastAPI** service to expose an API for clients to submit configuration details, integrating with an internal feature store and logging system.
- Collaborated with client-facing technical account managers to gather requirements and refine the onboarding workflow, ensuring a smooth integration experience for enterprise customers.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
