PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Partnered with business stakeholders to analyze and document complex business and functional requirements for a strategic programme, translating them into detailed business requirement documents and process flows.
- Translated high-level business needs into clear, actionable user stories with well-defined acceptance criteria, ensuring alignment with product vision and business value.
- Led team refinement sessions to prepare user stories for sprint planning, collaborating with cross-functional teams to ensure readiness and shared understanding of requirements.
- Managed product backlogs and assisted Product Managers with quarterly planning, prioritizing features and identifying dependencies to optimize development effort.
- Defined and documented story acceptance tests in collaboration with the development team, applying Acceptance Test-Driven Development (ATDD) principles to ensure quality and testability.
- Took ownership of user story sign-off, validating that delivered functionality met requirements and passed both automated and manual testing cycles.
- Identified and managed risks and dependencies associated with planned work, proactively communicating potential impacts to project timelines and scope.

SKILLS

Analysis & Requirements – Business Requirements Documents, Process Flows, Use Cases, User Stories, Acceptance Criteria, Backlog Management, Quarterly Planning, Risk Management, Dependency Management

Agile & Methodologies – Agile, Scrum, Sprint Planning, Team Refinement, ATDD

Tools & Technologies – JIRA, Confluence, SQL Developer, Insomnia, Kafka Offset Explorer, Datadog

Domain Experience – Financial Services Industry, Investment Management, Wealth Management

Core Skills – Systems Analysis, Stakeholder Management, Written Communication, Verbal Communication, Analytical Skills, Problem Solving

PROJECTS

Financial Services Strategic Programme Analysis

- Collaborated with business stakeholders to gather and analyze requirements for a key strategic initiative within the financial services sector, producing comprehensive business requirement documents.
- Developed detailed process flows and use cases to illustrate current-state and future-state operations, facilitating clear communication between business units and the technology team.
- Assisted in defining user stories and acceptance criteria, ensuring alignment with the product vision and facilitating successful sprint planning sessions.

Agile Backlog Refinement and User Story Definition

- Led backlog refinement sessions for a cross-functional development team, translating complex business needs into well-defined user stories ready for sprint execution.
- Defined clear acceptance tests in collaboration with QA, adhering to ATDD principles to ensure delivered solutions met specified requirements and quality standards.
- Managed product backlog items within JIRA, contributing to quarterly planning and sprint commitment by identifying dependencies and potential risks.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021
