PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot microservices**, including developing **RESTful APIs** for inter-service communication and data exchange, handling approximately 4,000 requests per minute.
- Developed and maintained backend services using **Java with Hibernate**, ensuring efficient data persistence and retrieval across relational databases, supporting complex financial transaction processing.
- Authored **JUnit tests** and conducted code reviews for **Java applications**, contributing to a 15% reduction in production defects by enforcing coding standards and best practices.
- Contributed to the design and implementation of **serverless solutions** on AWS Lambda, processing event-driven data streams for backend services.
- Managed and optimized **production systems**, responding to incidents and performing root cause analysis to maintain high availability for enterprise applications.
- Implemented security best practices across backend services, including data encryption at rest and in transit, and secure **API development** patterns.
- Containerized applications using **Docker** and managed deployments, laying the groundwork for orchestration in a cloud environment.

SKILLS

Cloud Platforms – AWS, Azure, GCP

Backend Development – Microservices, Serverless, RESTful APIs, GraphQL APIs, Java, Python, Spring Boot

Containerization & Orchestration – Docker, Kubernetes

Databases – SQL DB, No SQL DB, PostgreSQL, MySQL, Oracle

Development Practices – Agile, Scrum, CI/CD, Jenkins, Git, Code Reviews, Testing

Operations & Monitoring – Production Systems Management, Observability, Splunk, Dynatrace, CloudWatch

PROJECTS

Enterprise Java Backend Service Modernization

- Re-architected a monolithic Java application into a suite of **microservices** using **Spring Boot**, improving deployment frequency by 40%.
- Integrated **Hibernate** for efficient object-relational mapping, optimizing database interactions and reducing query times by an average of 30% for critical data entities.
- Developed a comprehensive suite of **unit and integration tests** using JUnit and Mockito, achieving over 85% code coverage for core business logic.

Cloud-Native Backend for Financial Data Processing

- Built scalable backend services on **AWS** utilizing **Lambda** and API Gateway to process high-volume financial transaction data.
- Implemented robust error handling and logging mechanisms using **CloudWatch**, enabling proactive monitoring and faster issue resolution.
- Containerized the backend services using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
