PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Reviewed and triaged **potential product bug alerts** within defined SLA windows, distinguishing between genuine issues and false positives.
- Investigated **crash rate anomalies** by performing log analysis, attempting issue reproduction, and validating spike durations, providing initial hypotheses to engineering.
- Collaborated with **product engineers** to provide detailed hypotheses, insights, and feedback on resolution blockers for escalated issues, ensuring timely updates.
- Developed **Python scripts** to automate data extraction and initial analysis for incident reports, reducing manual effort by approximately 15%.
- Participated in **Agile/Scrum ceremonies**, including sprint planning and daily stand-ups, contributing to defect tracking and task estimation within Jira.
- Managed production environments for enterprise applications, responding to **P1/P2 incidents** and performing root cause analysis using Splunk and Dynatrace.
- Containerized Java Spring Boot microservices using **Docker** and deployed them to **AWS EC2 instances**, ensuring consistent application environments.

SKILLS

Trust & Safety – Product Reliability, Bug Triage, Incident Investigation, Root Cause Analysis, SLA Management, Log Analysis

Programming Languages – Java, Python, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

Methodologies – Agile, Scrum

PROJECTS

Production Incident Analysis and Reporting Tool

- Developed a **Python-based application** to aggregate and analyze incident data from Splunk and Dynatrace, identifying common failure patterns.
- Engineered automated reports summarizing key incident metrics and trends for the operations team, improving visibility into system stability.
- Integrated the tool with Jira to automatically create tickets for recurring P1/P2 incidents, streamlining the defect tracking workflow.

Java Application Performance Monitoring Enhancement

- Enhanced a **Java Spring Boot application** by integrating custom logging and metrics collection to provide deeper insights into request processing times.
- Configured **Dynatrace** to monitor the instrumented Java application, enabling real-time performance analysis and alerting on anomalies.
- Developed **SQL queries** to extract historical performance data from PostgreSQL for trend analysis and capacity planning.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
