PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed scalable data pipelines and ETL architectures using **Python** and **advanced SQL** on Google's distributed data systems, processing terabytes of data daily.
- Contributed to the evolution of a large-scale data infrastructure, optimizing data models and schemas to maintain high performance for critical business intelligence reporting.
- Partnered with cross-functional stakeholders across business and engineering teams to translate complex analytics requirements into actionable data solutions, ensuring alignment with strategic goals.
- Collaborated with data scientists and business analysts to integrate investigative prototypes and metrics into stable, production-grade reporting environments, ensuring data integrity and accessibility.
- Authored clear technical design documents and executed thorough code reviews to advocate for data quality and proactive bug resolution within the data engineering team.
- Managed stakeholder expectations and project timelines for data infrastructure enhancements, ensuring delivery within defined scope and resource constraints.
- Developed and maintained ETL processes operating on a variety of structured and unstructured data sources, integrating disparate systems to create a unified data view.

SKILLS

Data Engineering – ETL, ELT, Data Pipelines, Data Modeling, Data Warehousing, Distributed Data Systems

Programming Languages – Python, SQL, Java

Cloud Platforms & Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Google Cloud Platform (GCP), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle, NoSQL

Data Visualization & BI – Power BI, Tableau, DAX, Power Query

Development Tools & Methodologies – Git, Jenkins, Jira, Agile, Scrum

PROJECTS

Enterprise Data Pipeline for Financial Operations

- Engineered a robust **Python**-based ETL pipeline to ingest and process financial transaction data from multiple sources, supporting reconciliation workflows for an enterprise client.
- Developed complex **SQL** queries and stored procedures for data transformation and aggregation, reducing data processing time by **30%** for daily operational reports.
- Designed and implemented data models within a **PostgreSQL** database to support the reporting needs of a financial-services operations dashboard, ensuring data accuracy and consistency.

Customer Analytics Dashboard Development

- Built interactive **Power BI** dashboards to visualize key performance indicators and operational metrics for business stakeholders, enhancing decision-making capabilities.
- Applied **DAX** measures and **Power Query** for data shaping and analysis, transforming raw data into actionable insights for a team of 8 business analysts.
- Collaborated with business analysts to gather reporting requirements and deliver tailored data visualizations, improving the clarity of system performance trends.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
