PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **distributed software-defined networking** solutions, abstracting complex routing hardware into manageable services for a large-scale network infrastructure.
- Implemented robust, scalable software systems for network routing, ensuring production code was resilient and maintainable with a focus on **high availability**.
- Managed task priorities in a **self-directed manner**, contributing to the successful completion of project components within a fast-paced development cycle.
- Proactively clarified ambiguities in technical requirements and guided the team to effectively solve complex problems across multiple areas of the distributed system.
- Drove high standards by contributing to code qualification, comprehensive documentation, and production monitoring, improving overall code quality and system reliability.
- Communicated and aligned work with **cross-functional teams** and partners to coordinate timelines and ensure seamless integration of assigned project components.
- Containerized network services using **Docker** and deployed them to a **Kubernetes** cluster, configuring resources and ensuring predictable rollouts.

SKILLS

Networking – Software Defined Networking (SDN), internet routing technologies, router/switch telemetry, distributed systems, network hardware abstraction

Cloud Native – Kubernetes, Docker, containerisation, serverless computing

Programming Languages – Go, Python, Java

Software Development – System design, API development, REST APIs, code reviews, Agile methodologies, CI/CD

Operations – Production monitoring, system resilience, maintainability, task management, technical problem-solving, documentation

PROJECTS

Distributed Network Routing Service

- Developed a **Go-based microservice** to manage routing configurations across a fleet of network devices, abstracting low-level hardware protocols.
- Implemented **RESTful APIs** for dynamic route updates and policy enforcement, integrating with existing network management tools.
- Containerized the service using **Docker** and deployed it onto a **Kubernetes** cluster, managing configuration and scaling with Helm charts.

Network Telemetry Pipeline

- Engineered a **Python** data pipeline to ingest and process **router/switch telemetry** data, transforming raw logs into actionable insights.
- Developed **stream processing** logic using Kafka and Flink to detect network anomalies and generate alerts for operational teams.
- Integrated the pipeline with a **Prometheus** monitoring system, enabling real-time visualization of network performance metrics.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
