PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for internal tooling, handling request routing and authentication for an 8-person team.
- Implemented backend logic for a real-time data processing pipeline using **Python** and **FastAPI**, processing approximately 1,500 events per second during peak loads.
- Designed and maintained relational database schemas using **PostgreSQL** and **MySQL**, writing complex SQL queries for data extraction and validation across multiple enterprise systems.
- Contributed to the design and architecture of large-scale, real-time software systems for network traffic engineering, focusing on optimized routing and load balancing.
- Participated in code reviews for peer engineers, providing feedback on style guidelines, code accuracy, and efficiency to ensure adherence to best practices.
- Analyzed and debugged production issues within distributed systems, triaging product or system defects and identifying root causes impacting network operations and quality.
- Containerized microservices using **Docker** and managed deployments to **AWS EC2** instances, ensuring efficient resource utilization and predictable rollouts.

SKILLS

Languages – Java, Python, SQL, C++

Frameworks/Libraries – Spring Boot, FastAPI, pandas, NumPy, scikit-learn

Databases – PostgreSQL, MySQL, Oracle

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Development Tools – Git, Jenkins, Jira, Confluence

Concepts – Data Structures, Algorithms, Network Architecture, Performance Optimization, Real-time Systems

PROJECTS

Distributed System for Network Traffic Optimization

- Designed a high-throughput distributed system in **Java** to manage and optimize network traffic flow across global infrastructure, focusing on load balancing and efficient routing.
- Implemented real-time data ingestion and processing using **Python** and **FastAPI** to capture network telemetry, enabling dynamic adjustments to traffic patterns.
- Developed RESTful APIs for inter-service communication and configuration management, ensuring seamless integration with existing network control planes.

Automated Data Pipeline for System Monitoring

- Engineered an automated data pipeline using **Python** and **SQL** to aggregate system performance metrics from various sources, supporting an 8-person operations team.
- Developed **PostgreSQL** queries and stored procedures to extract and transform monitoring data, reducing manual reporting time by approximately 30%.
- Containerized the pipeline components with **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
