PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, including request validation and error handling for a financial services client.
- Developed and maintained **Hibernate** ORM mappings and queries for a PostgreSQL database, ensuring data integrity and efficient retrieval for enterprise applications.
- Authored **JUnit** tests and conducted code reviews for Java modules, improving code quality and reducing production defects by **15%**.
- Provided 24/7 production support for critical **Java** and .NET applications, triaging and resolving P1/P2 incidents within defined SLAs using **Splunk** and **Dynatrace**.
- Automated data extraction and reporting tasks using **Python** scripts, processing approximately **10 GB** of daily data for operational analytics.
- Managed and troubleshooted **Linux** server environments, including log analysis, shell scripting for cron jobs, and performance tuning on EC2 instances.
- Containerized backend services using **Docker** and orchestrated deployments to **AWS ECS**, improving application portability and deployment consistency.

SKILLS

Languages – Java, Python, SQL, Linux Shell Scripting

Frameworks/Libraries – Spring Boot, Hibernate, JUnit, pandas, NumPy, Flask

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch, ECS), Docker, Kubernetes

Databases – PostgreSQL, MySQL, Oracle

Tools/Observability – Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, tcpdump, Wireshark, traceroute

Networking – TCP/IP, HTTP/S, network troubleshooting, packet analysis, network protocols

PROJECTS

High-Availability Network Monitoring System (HCL Technologies)

- Developed a **Python**-based application to ingest network performance metrics from distributed agents, focusing on **ultra-low-latency** data collection.
- Implemented **REST APIs** using **Flask** for real-time data querying and integrated with **PostgreSQL** to store time-series network data.
- Designed a notification module that triggered alerts based on pre-defined latency and packet loss thresholds, reducing manual monitoring overhead by **~40%**.

Customer Network Diagnostics Tool (HCL Technologies)

- Built a **Python** command-line tool to automate network diagnostics for enterprise clients, incorporating **traceroute** and **tcpdump** functionalities.
- Provided clear, actionable output for technical audiences, detailing network paths, latency spikes, and potential packet loss segments.
- Documented usage and troubleshooting steps for the tool, enabling customer support teams to resolve common network issues more efficiently.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
