PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed fleet technical records data, updating and controlling documentation for approximately 1,400 aircraft leases, ensuring adherence to established standards.
- Administered and maintained the technical specification database, inputting monthly utilization data and tracking component status changes for the aviation lease services team.
- Analyzed and updated shop visit events for aircraft components, ensuring accurate maintenance history tracking and compliance with service level agreements.
- Developed Python scripts to automate data validation for aircraft technical information, reducing manual data entry errors by an estimated **15%**.
- Designed and implemented REST APIs using **Java Spring Boot** to integrate disparate enterprise systems, facilitating seamless data exchange across operational platforms.
- Contributed to the development and maintenance of CI/CD pipelines using **Jenkins** and **Git** for automated build, testing, and deployment of enterprise applications.
- Supported production environments for enterprise applications, responding to P1/P2 incidents, analyzing logs with **Splunk**, and managing SLAs to ensure system stability.

SKILLS

Aviation Advisory – Fleet technical records management, Asset review system control, Technical specification database administration, Component status tracking, Aircraft maintenance reserve claims

Core Technologies – Java, Spring Boot, Python, SQL, REST APIs, Docker, Linux, Git, Jenkins

Data Management – Data validation, ETL, Data pipelines, Database administration, Reporting

Cloud & CI/CD – AWS (EC2, S3, Lambda, CloudWatch), Jenkins, Git

Business Tools – Microsoft Excel, Microsoft Word, Microsoft Outlook, Jira, Confluence

Analytics & Visualization – Power BI, Tableau, DAX, Power Query, R, pandas, scikit-learn

PROJECTS

Aircraft Lease Data Management System (HCL Technologies)

- Developed a Python-based system to ingest and validate technical specifications for a fleet of aircraft, processing over 500 unique aircraft types.
- Implemented automated data quality checks using SQL queries against a PostgreSQL database, identifying and flagging inconsistencies in component status and utilization data.
- Created automated reporting modules in Python to generate monthly summaries of fleet technical data, reducing manual reporting effort by approximately **20 hours** per month.

Enterprise System Integration Framework (HCL Technologies)

- Designed and built a modular framework using **Java Spring Boot** for integrating enterprise resource planning (ERP) systems with operational dashboards.
- Developed RESTful APIs to expose and consume data between systems, ensuring secure and efficient data transfer for core business functions.
- Managed database schema changes and data migration scripts for integrating PostgreSQL and Oracle databases, supporting seamless cross-system data flows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
