PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **translational strategies** for preclinical studies, interpreting complex data to advance therapeutic program objectives and define **biomarker discovery** roadmaps.
- Managed external **Contract Research Organizations (CROs)**, ensuring high-quality and timely execution of experimental programs, including **study design** and data interpretation for asset readiness.
- Developed and validated **biomarkers** to assess drug response and understand mechanism of action, creating measures for both animal and patient studies.
- Contributed to the preparation of non-clinical sections for key regulatory documents, including **IND supporting documentation** and **briefing meeting packages** for regulatory authority interactions.
- Led the planning and implementation of experimental programs with internal and external stakeholders, focusing on asset readiness for clinical development phases.
- Synthesized and communicated preclinical and clinical **biomarker study results** to support critical program decision-making and strategic guidance.
- Containerized Java Spring Boot services for data processing pipelines and deployed them to an **AWS EC2** instance managed via **Jenkins CI/CD**.

SKILLS

Biomarkers – discovery, validation, assay development, clinical trial support

Drug Development – translational medicine, preclinical studies, clinical programs, IND preparation, regulatory strategy

Project Management – external partner management, CRO management, experimental program planning, stakeholder coordination, budget management

Data Analysis & Interpretation – scientific strategy, data interpretation, biomarker measures, preclinical data, clinical data

Programming & Systems – Java, Spring Boot, Python, SQL, AWS, Docker, Jenkins, Linux

PROJECTS

Biomarker Strategy for Novel Therapeutic Program

- Defined a multi-phase **biomarker strategy** for a novel therapeutic candidate, integrating preclinical assay development with potential clinical trial applications.
- Collaborated with discovery and pharmacology teams to identify and prioritize key **biomarkers** for assessing drug efficacy and mechanism of action, using **Python** for data analysis.
- Authored documentation outlining the validation plan for selected **biomarkers**, detailing experimental design and expected outcomes for internal review.

External CRO Performance Analysis Dashboard

- Developed a **Power BI dashboard** to track and analyze performance metrics for multiple **Contract Research Organizations (CROs)** engaged in preclinical studies.
- Integrated data from disparate vendor reports using **Power Query**, enabling visualization of study timelines, budget adherence, and data quality for **4 CRO partners**.
- Presented key performance indicators and identified areas for process improvement to the translational medicine leadership team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
