PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and scaled **ETL/ELT pipelines** using Python to integrate diverse data sources, ensuring high availability and modularity.
- Designed and implemented **FastAPI microservices** to expose data insights, supporting internal services and stakeholder reporting with p95 latency under 200ms.
- Optimized data structures and schemas within a **cloud-based data warehouse**, enabling rapid query performance for analytical and operational demands.
- Automated data validation and cleansing processes using **Python scripts**, guaranteeing data integrity and adherence to security standards for critical datasets.
- Led data transformations using **DBT**, structuring the data warehouse for modularity and efficient high-level analysis.
- Engineered production-ready **Python code** for data processing, incorporating robust error handling and logging mechanisms for reliable execution.
- Containerized data pipeline services with **Docker** and deployed them to a Kubernetes cluster, managing configuration and resource allocation for predictable rollouts.

SKILLS

Data Engineering – ETL, ELT, DBT, data modeling, data warehousing, data validation, data integrity, data pipelines, cloud data warehousing.

Programming Languages – Python, SQL.

API Development – FastAPI, REST APIs.

Cloud & DevOps – AWS, Docker, Kubernetes, CI/CD, Jenkins, Git.

Databases – PostgreSQL, MySQL, Oracle, BigQuery.

PROJECTS

Data Integration Platform for Customer Analytics

- Built scalable **Python ETL pipelines** to ingest data from multiple external sources, including API endpoints and database dumps.
- Developed **DBT models** to transform and structure raw data into a unified schema within a cloud data warehouse, facilitating downstream analysis.
- Implemented automated data quality checks and alerting mechanisms to ensure the integrity of ingested and transformed data before it reached analytical layers.

Real-time Data API for Business Intelligence

- Created a **FastAPI application** to serve aggregated business metrics, directly supporting BI dashboards and operational reporting needs.
- Optimized **SQL queries** against a PostgreSQL database to ensure rapid data retrieval, reducing API response times by an average of 40%.
- Containerized the API using **Docker** for consistent deployment across development and production environments.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
