PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed high-performance **Node.js** microservices for a wallet infrastructure platform, handling real-time transaction processing.
- Implemented **secure coding practices** and authentication mechanisms to safeguard user assets and sensitive data within the digital asset ecosystem.
- Collaborated with international engineering teams in an **Agile** environment to integrate new features into a rapidly growing backend system.
- Worked with **MySQL** and **MongoDB** databases to ensure efficient data storage, retrieval, and synchronization for wallet operations.
- Optimized backend services to improve reliability and scalability, troubleshooting performance issues across distributed systems.
- Contributed to architectural decisions for a **peer-to-peer** network, focusing on system resilience and maintainability for a global platform.
- Containerized backend services using **Docker** and deployed to cloud environments, ensuring consistent performance and simplified management.

SKILLS

Backend Development – Node.js, JavaScript, Microservices, Distributed Systems, Scalability, High-Availability

Databases – MySQL, MongoDB, SQL

Security – Backend Security Principles, Secure Coding Practices, Data Protection

Technologies – Peer-to-Peer, Blockchain, Digital Assets, Fintech

Methodologies – Agile, Scrum

Cloud & Containerization – Docker, AWS (EC2, S3, Lambda, CloudWatch), Linux, Shell Scripting

PROJECTS

Decentralized Wallet Infrastructure Backend

- Developed **Node.js** microservices to manage user wallets and facilitate secure digital asset transactions, integrating with **PostgreSQL** for data persistence.
- Implemented **REST APIs** for communication between wallet services and the frontend, ensuring seamless user experience and data synchronization.
- Designed and deployed containerized applications using **Docker** on **AWS EC2**, establishing CI/CD pipelines with **Jenkins** for automated deployments.

Real-Time Transaction Monitoring System

- Built a Python-based ETL pipeline to ingest and process transaction data from various sources, ensuring data integrity for financial operations.
- Developed **SQL queries** and scripts to validate transaction flows and identify discrepancies, supporting reconciliation workflows across distributed databases.
- Created operational dashboards using **Splunk** to visualize transaction volumes and system health, enabling proactive issue detection for the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
