PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** REST APIs for inter-service communication, handling approximately **5,000 requests per minute** during peak loads.
- Developed and maintained **JPA** entities and data access objects for a core financial transaction processing service, ensuring data integrity across **PostgreSQL** and **Oracle** databases.
- Authored **JUnit** and **Mockito** tests for critical Java components, increasing code coverage by **18%** and reducing post-deployment defects.
- Architected and deployed **CI/CD** pipelines using **Jenkins** and **Git** for automated build, test, and deployment of Java applications to **AWS EC2** instances.
- Collaborated with enterprise customers to understand technical requirements and design end-to-end solutions for integrating their systems with our **AI-enabled platform**.
- Built reusable **technical accelerators** and reference architectures for customer engagements, focusing on **DevSecOps** workflows and **AI/LLM** integration patterns.
- Containerized microservices using **Docker** and managed deployments on **AWS EKS**, configuring basic resource limits and network policies for improved stability.

SKILLS

Languages – Java, Python, SQL, Bash

Frameworks/Libraries – Spring Boot, JPA, Hibernate, JUnit, Mockito, pandas, NumPy, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes (EKS), Jenkins, Git, Terraform, Ansible, Helm

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Splunk, Dynatrace, Jira, Confluence, GitLab CI/CD, AI/LLM

Methodologies – Agile, Scrum, DevSecOps, System Design

PROJECTS

Enterprise DevSecOps Platform Integration

- Led technical discovery sessions with two strategic enterprise customers to assess their existing **DevSecOps** pipelines and identify integration opportunities with our **AI-enabled platform**.
- Designed and developed **proof-of-concept** implementations demonstrating the seamless integration of customer CI/CD workflows with the platform's security and AI capabilities.
- Authored comprehensive **runbooks** and technical guides to facilitate customer adoption and address common deployment challenges for self-managed environments.

AI-Powered Transaction Anomaly Detection

- Engineered a Python-based feature pipeline to extract transaction metadata and behavioural signals from a dataset of **~1.5 million records**.
- Trained a **scikit-learn** classifier to identify anomalous transactions, achieving an **AUC of 0.88** on a held-out test set.
- Developed a **FastAPI** service to expose model inference via a REST API, achieving a p95 latency of **150ms** under simulated load.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
