## PROFESSIONAL EXPERIENCE

### Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Java Spring Boot** microservices for secure API endpoints, processing approximately 500 requests per second during peak loads.
- Designed and implemented secure data pipelines using **Python** for ETL processes on sensitive financial datasets, ensuring compliance with data privacy regulations.
- Implemented **Hibernate** for object-relational mapping in enterprise Java applications, managing complex data relationships across multiple databases and reducing query complexity by **30%**.
- Conducted thorough code reviews for peer developers on **Java** and **Spring Boot** applications, identifying and rectifying potential security vulnerabilities and performance bottlenecks.
- Executed threat modelling for multiple applications, assessing risks and recommending security enhancements to stakeholders to mitigate vulnerabilities identified through **penetration testing**.
- Contributed to the design and implementation of **cloud-native applications** on **AWS**, including services like EC2, S3, and Lambda, to enhance application security and scalability.
- Managed and troubleshooted production incidents for enterprise systems, performing root cause analysis and implementing corrective actions to maintain system stability and meet SLAs using **Splunk** and **Dynatrace**.

## SKILLS

**Cloud Platforms** – AWS, EC2, S3, Lambda, CloudWatch

**Security Concepts** – IAM, Authentication, OIDC, SAML, Threat Modelling, Vulnerability Assessment, Penetration Testing

**Programming Languages** – Java, Python, SQL

**Frameworks & Libraries** – Spring Boot, Hibernate, pandas, NumPy, scikit-learn, Flask, FastAPI

**Databases** – PostgreSQL, MySQL, Oracle, Redshift, Snowflake, Databricks

**DevOps & CI/CD** – Docker, Kubernetes, Jenkins, Terraform, CloudFormation, Git

## PROJECTS

### Secure Cloud-Native Application Development (HCL Technologies)

- Developed a **Java Spring Boot** application on **AWS** to manage user authentication and authorization, integrating **SAML** for single sign-on capabilities.
- Implemented security best practices including input validation, parameterized queries, and secure credential storage, reducing potential injection vulnerabilities by an estimated **40%**.
- Containerized the application using **Docker** and deployed it to an **AWS ECS** cluster, establishing CI/CD pipelines with **Jenkins** for automated testing and deployment.

### Data Security Posture Management Automation (HCL Technologies)

- Automated the discovery and classification of sensitive data across **AWS S3** buckets using a **Python** script, identifying PII and financial data stores.
- Developed automated alerts for policy violations using **CloudWatch Events** and integrated them with a notification system, enabling prompt response to data security misconfigurations.
- Generated comprehensive reports on data security posture using **pandas** and custom SQL queries against metadata logs, providing insights to security operations teams.

## EDUCATION

**M.Sc. Data Analytics** — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science** — SNS College of Technology, Coimbatore, India

2021

## CERTIFICATIONS

---

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
