PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed data integration and transformation processes for disparate enterprise systems, developing **Python** scripts to extract, load, and move data across relational and NoSQL databases.
- Built and optimized scalable data acquisition solutions using **PySpark** on AWS EMR, processing diverse file formats including **Parquet** and **Delta Tables** to meet functional and non-functional requirements.
- Provided complex analysis and problem-solving expertise for data integration challenges, developing **business intelligence** designs that supported operational reporting and decision-making.
- Engineered data pipelines using **AWS Glue** and **Lambda**, orchestrating data flows from various sources into a centralized **data lake** on S3 for downstream analytics.
- Implemented data warehousing and data lake concepts, including **data modeling** and schema design, to ensure efficient data storage and retrieval for analytical workloads.
- Collaborated with cross-functional teams, including Product Management and System Administration, to integrate data services and ensure seamless data exchange between internal products.
- Containerized data processing services using **Docker** and deployed them to **AWS EKS**, managing configurations with **Helm** and monitoring performance via **CloudWatch**.

SKILLS

Cloud Platforms – AWS (EMR, S3, Glue, Lambda, CloudWatch, EKS), Databricks, Oracle, DynamoDB, PostgreSQL, MySQL

Data Engineering & Warehousing – Data Integration, Data Acquisition, ETL, Data Transformation, Data Lake, Data Modeling, Apache Airflow, PySpark, Scala, Delta Tables, Parquet, ORC, Avro, Sequence Files, Big Data Technologies

Programming Languages – Python, Java, SQL, Scala

CI/CD & DevOps – Jenkins, Git, Artifactory, Yaml, Maven, Docker, Kubernetes, Terraform, CloudFormation, Infrastructure as Code (IaC)

API & Services – REST APIs, Distributed Services, Microservices

Tools & Methodologies – Jira, Confluence, Agile, Scrum, AI-assisted developer tools (e.g., GitHub Copilot)

PROJECTS

AWS Data Lake and ETL Pipeline Implementation

- Designed and implemented a scalable data lake on **AWS S3** to consolidate data from multiple enterprise systems, supporting a **3 TB** data volume.
- Developed robust **ETL pipelines** using **AWS Glue** and **PySpark** to extract, transform, and load data, integrating diverse formats like **Parquet** and **CSV**.
- Configured and managed data ingestion jobs using **Apache Airflow** for automated scheduling and monitoring of data pipelines, reducing manual intervention by **40%**.

Distributed Systems Data Integration Service

- Built a high-performance data integration service using **Java Spring Boot** and **PostgreSQL** to handle data exchange between disparate internal applications.
- Developed **REST APIs** for data access and manipulation, ensuring secure and efficient communication across distributed services with **p95 latency** under **200ms**.
- Containerized the service with **Docker** and deployed it to an **AWS EC2** environment, integrating with **Jenkins** for continuous integration and deployment.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
