PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **Java Spring Boot** REST APIs for internal enterprise applications, ensuring secure and stable system synchronization.
- Architected complex application modules, adhering to strict **design standards** and enhancing existing enterprise codebases.
- Analyzed and refactored enterprise application code to build new services and APIs, improving overall system functionality and performance.
- Automated recurring operational issues through **Python scripting**, reducing manual intervention and improving software stability by approximately **15%**.
- Managed production support for enterprise applications using **Splunk** and **Dynatrace**, responding to P1/P2 incidents and maintaining SLA commitments.
- Collaborated within an **agile** environment, participating in sprint planning, technical estimations, and code reviews to deliver high-quality solutions.
- Containerized Java applications using **Docker** and deployed them to **AWS EC2** instances, managing CI/CD pipelines with **Jenkins** for streamlined releases.

SKILLS

Languages – Java, Python, SQL, R, JavaScript

Frameworks & Libraries – Spring Boot, Spring, Hibernate, JPA, scikit-learn, pandas, NumPy, ReactJS

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, CI/CD, Agile Methodologies

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Splunk, Dynatrace, Jira, Confluence, Microsoft 365

Concepts – System Design, Application Development, Testing, Stability, Architecture, SDLC, API Development, AI Integration, Prompt Engineering

PROJECTS

Internal Board Meeting Preparation Platform (Java)

- Developed core **Java Spring Boot** microservices to manage meeting agendas, participant data, and document sharing for senior leadership.
- Integrated with **Microsoft 365** APIs to synchronize calendar events and automatically pull relevant documents for board meetings, reducing manual effort by an estimated **30%**.
- Implemented robust error handling and logging mechanisms using **JPA** and **PostgreSQL**, ensuring data integrity and system stability during critical preparation phases.

Automated Financial Reconciliation Workflow (Python)

- Engineered a **Python**-based data pipeline to automate the reconciliation of financial transactions between internal ledgers and external statements.
- Designed and implemented data validation rules using **pandas** and **SQL** to identify discrepancies, processing approximately **10,000** transaction records per batch.
- Created scheduled reports detailing reconciliation outcomes and exceptions, which were delivered via email to operations teams, improving reporting efficiency.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
