PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and deployed **Hugging Face models** as containerized APIs using **FastAPI** on a managed **Kubernetes** service, supporting experimental computer vision pipelines for underwriting analysis.
- Managed **GPU instance workflows** on **AWS EC2**, ensuring compatibility and proper **CUDA/NVIDIA driver** setup for large model deployment and optimizing **dependency management**.
- Integrated with existing **data labelling workflows**, ensuring seamless data flow for model training and validation processes within the analytics tech group.
- Contributed to the design and architecture of new software features, working collaboratively with data science and engineering teams to deliver high-quality solutions.
- Mentored and guided junior team members in writing clean, maintainable code and adhering to team coding standards, promoting knowledge sharing and skill development.
- Owned and delivered well-defined features and user stories, actively participating in agile ceremonies and providing regular progress updates.
- Implemented automated unit and integration tests as part of the software development lifecycle, applying good security processes such as threat modelling to developed code.

SKILLS

MLOps – Hugging Face, model deployment, containerized APIs, FastAPI, Kubernetes, AWS EC2, GPU instances, CUDA, NVIDIA drivers, dependency management

Cloud & Containerization – AWS, EC2, EKS, Docker, Kubernetes, CI/CD, Jenkins, Git

Programming Languages – Python, Java, SQL, R

Data & Analytics – pandas, NumPy, scikit-learn, data modelling, data warehousing, Power BI, Tableau, DAX

Backend Development – Spring Boot, REST APIs, microservices

Observability & Support – Splunk, Dynatrace, CloudWatch, incident response, SLA management

PROJECTS

Computer Vision Pipeline for Underwriting Analysis

- Engineered and deployed a **computer vision model** pipeline using **Python** and **FastAPI**, packaged as a containerized API for deployment on **Kubernetes**.
- Managed **GPU instance provisioning** on **AWS**, configuring necessary drivers and libraries to support the computational demands of deep learning models.
- Integrated the model API with an existing **data labelling platform**, enabling iterative model retraining based on new datasets and feedback.

ML Model Serving Framework (AWS & Kubernetes)

- Developed a reusable framework for packaging and deploying machine learning models as scalable REST APIs using **FastAPI** and **Docker**.
- Configured **CI/CD pipelines** with **Jenkins** to automate the build, test, and deployment of model services to an **AWS EKS** cluster.
- Implemented basic monitoring and logging for deployed models, tracking request latency and error rates to ensure service reliability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
