PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Assisted in the development and maintenance of **AWS infrastructure**, specifically focusing on **EC2 instances** and **S3 bucket** configurations under senior engineer guidance.
- Supported the maintenance and enhancement of **CI/CD pipelines** using **Jenkins**, ensuring smooth integration of code changes through multi-stage build and deployment processes.
- Contributed to the administration and support of **Linux-based production systems**, including log analysis and shell scripting for routine tasks.
- Wrote and maintained automation scripts using **Python** to streamline data processing and reporting tasks, reducing manual effort by approximately **15%**.
- Participated in incident response and troubleshooting efforts for production systems, contributing to root cause analysis and documentation under senior engineer supervision.
- Supported the monitoring of **SLIs and SLOs** using **CloudWatch**, assisting in identifying performance bottlenecks and system availability issues.
- Assisted with the deployment and maintenance of **containerised applications** using **Docker**, preparing them for orchestration in Kubernetes environments.

SKILLS

Cloud Platform – AWS, EC2, S3, Lambda, CloudWatch

Containerisation – Docker, Kubernetes

CI/CD – Jenkins, Git

Scripting & Automation – Python, Bash, PowerShell

Operating Systems – Linux, Windows

Infrastructure as Code – Terraform, CloudFormation

Monitoring & Observability – Prometheus, Grafana

PROJECTS

AWS Infrastructure Automation with Terraform

- Developed **Terraform scripts** to provision and manage **AWS resources** including EC2 instances, VPCs, and security groups, enabling repeatable infrastructure deployments.
- Implemented state management for Terraform configurations using **S3 and DynamoDB**, ensuring consistency and collaboration for a team of 4 engineers.
- Integrated Terraform deployments into a **Jenkins CI/CD pipeline**, automating infrastructure provisioning and updates based on Git commits.

Production Systems Monitoring and Alerting

- Configured **Prometheus and Grafana** for comprehensive monitoring of Linux and Windows production servers, visualizing key performance indicators and system health.
- Established custom alerting rules in **Grafana** based on defined SLIs, reducing the mean time to detect critical incidents by approximately **20%**.
- Developed **Python scripts** to parse system logs and feed relevant metrics into Prometheus, enhancing the accuracy of monitoring dashboards.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
