PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Owned features end-to-end for a digital client experience platform, from data consumption and API logic to client-facing UI development using **React** and **TypeScript**.
- Self-sourced data by querying our data platform, writing **SQL**, and understanding upstream structures to power risk analytics and insurance recommendations.
- Built and operated scalable, secure data pipelines using **Python** and **AWS Lambda** that feed into curated data layers for risk modelling.
- Implemented front-end mathematical computations for actuarial analysis, including exposure analysis and loss projections, validating results with **DAX** and **Power BI**.
- Developed backend services and **Node.js** APIs with **NestJS** to support data access, computation, and model inference.
- Integrated AI tools such as **GitHub Copilot** into the development workflow to increase code quality and delivery throughput.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments across development and production.

SKILLS

Backend Development – TypeScript, Node.js, NestJS, Java, Spring Boot, Python, Flask, FastAPI, REST APIs

Frontend Development – React, Angular, HTML, CSS, JavaScript, Data Visualization, D3.js, Recharts

Data & Analytics – SQL, PostgreSQL, MySQL, Oracle, Databricks, Power BI, Tableau, DAX, Power Query, R, pandas, NumPy, scikit-learn

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, CI/CD

Domain Knowledge – Insurance Risk, Actuarial Computation, Retail Operations, Financial Services Operations

PROJECTS

Client Renewal Strategy Dashboard (HCL Technologies)

- Developed an interactive **Power BI** dashboard to visualize client renewal metrics and identify at-risk accounts, enabling proactive engagement strategies.
- Engineered **Python** scripts to automate data extraction and transformation from multiple enterprise systems, feeding curated datasets into the dashboard.
- Collaborated with business analysts to define key performance indicators and ensure the dashboard accurately reflected operational priorities and client needs.

Insurance Risk Analytics Platform (HCL Technologies)

- Built backend **Java Spring Boot** services to ingest and process large volumes of client risk data, supporting downstream analytical models.
- Implemented data validation and cleansing routines using **SQL** across **PostgreSQL** and **Oracle** databases to ensure data integrity for the analytics platform.
- Designed and deployed REST APIs for data access, allowing other internal systems to consume processed risk information with defined SLAs.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
