PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Automated recurring system maintenance tasks using **Python scripts** and **cron jobs**, reducing manual effort by an estimated **15 hours per week**.
- Managed production incidents for enterprise applications on **AWS**, responding to P1/P2 alerts via **Splunk** and **Dynatrace**, and coordinating resolution efforts to meet SLAs.
- Developed and maintained **Java Spring Boot** REST APIs for internal services, focusing on backend logic and data persistence layers, processing approximately **4,000 requests per hour**.
- Collaborated with cross-functional teams to implement improvements to on-call support processes, refining the customer support workflow and automating common problem resolutions for runtime infrastructure.
- Provided technical guidance and support to market-facing teams exploring new technologies within the ecosystem, assisting with integration challenges and best practices.
- Addressed security vulnerabilities by analyzing system logs and collaborating with development teams to implement necessary fixes, ensuring system integrity.
- Containerized Java applications using **Docker** and deployed them to an **AWS EC2** environment, managing configurations and basic resource allocation.

SKILLS

Languages – Python, Java, SQL, Shell Scripting

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud/Infrastructure – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Monitoring/Observability – Splunk, Dynatrace, CloudWatch

Tools – Jira, Confluence, Linux

Domain – Payments Operations, Transaction Monitoring, ERP Integration Support

PROJECTS

Automated Payment Reconciliation Service (HCL Technologies)

- Developed a **Python** service to automate the reconciliation of financial transaction data between disparate systems, identifying and flagging discrepancies for manual review.
- Engineered data pipelines using **pandas** to process and transform large datasets, reducing the time required for reconciliation checks from 4 hours to **45 minutes**.
- Integrated the service with existing enterprise systems via **REST APIs** and scheduled database queries against **PostgreSQL**, ensuring seamless data flow.

System Health Monitoring and Alerting Tool (HCL Technologies)

- Built a dashboard application using **Java Spring Boot** to aggregate and visualize system health metrics collected from **Dynatrace** and **Splunk** logs.
- Implemented custom alerting rules based on predefined thresholds, enabling proactive identification of potential issues and reducing critical incident response time by approximately **20%**.
- Designed the application with a focus on stability and performance, ensuring continuous operation for monitoring critical financial services infrastructure.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
