PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Collaborated with engineering and construction managers to develop comprehensive project plans and ensure delivery on schedule for enterprise data centre projects.
- Developed detailed scope-of-works (SoW), task information deliverables lists (TIDP), and responsibility matrices (RACI) for CSA disciplines on major construction projects.
- Attended numerous design-related meetings, providing continual input for optimisation and integration with electrical and mechanical systems.
- Assisted in managing the deliverables and approvals processes for design packages, ensuring full approval for procurement and construction.
- Conducted site visits to monitor and report on the progress and quality of work, ensuring adherence to design specifications.
- Prepared comprehensive handover packs to site teams for assigned packages, detailing technical specifications and construction requirements.
- Containerised Java Spring Boot applications using Docker and deployed them to AWS EC2 instances, managing CI/CD pipelines with Jenkins for automated builds and deployments.

SKILLS

Construction – CSA disciplines, scope-of-works, TIDP, RACI, site visits, design standards, constructability, value engineering, OSM, QEHS standards, handover packs, technical submittals, pre-construction services agreements.

Project Management – Project plans, design delivery schedules, RFI, deviation tracker, lessons learnt, interface trackers, scope gap trackers, design change tracker, Value Engineering Register, OSM Register, change control management.

Engineering Software – BIM, Revit, AutoCAD, ACC.

Programming Languages – Java, Python, SQL, Spring Boot, REST APIs.

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git.

Databases – PostgreSQL, MySQL, Oracle.

PROJECTS

Construction Design Optimisation Platform (HCL Technologies)

- Developed Python scripts to automate the generation of preliminary design proposals based on client-specific parameters, reducing initial drafting time by ~30%.
- Implemented data validation checks for design documents using SQL queries against a PostgreSQL database, catching over 95% of common data inconsistencies before formal review.
- Created interactive dashboards using Power BI to visualise project progress, resource allocation, and potential risk areas for management review.

Site Operations Monitoring and Reporting Tool (HCL Technologies)

- Built a Java Spring Boot application to ingest and process site operational data, providing real-time status updates for ongoing construction activities.
- Designed and implemented REST APIs for seamless integration with existing enterprise systems, facilitating data exchange between site teams and central engineering.
- Managed CI/CD pipelines using Jenkins for automated testing and deployment of the monitoring application, ensuring timely updates and stability.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
