PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Java Spring Boot** RESTful APIs for cross-service data exchange, integrating **Hibernate** for robust data persistence across multiple enterprise systems.
- Developed and maintained **Java Spring Boot** microservices, focusing on object-oriented design principles and implementing **JUnit** tests to ensure code quality and maintainability.
- Engineered **Python** scripts to automate ETL processes, transforming and loading data from disparate sources into a centralized data warehouse, supporting scheduled reporting operations.
- Collaborated with program managers and senior engineers to deliver feature sets, participating in **design and architecture** reviews and providing technical estimations for development sprints.
- Mentored and coached **junior engineers** on best practices for writing clean, performant, and maintainable code, fostering a culture of shared learning and technical excellence.
- Contributed to the design and implementation of **loosely coupled, componentized software** solutions, emphasizing reusability and adherence to industry coding standards and patterns.
- Containerized **Java Spring Boot** applications using **Docker** and deployed them to **AWS EC2** instances, managing configurations and ensuring smooth integration with existing cloud infrastructure.

SKILLS

Languages – Java, Python, C++, C#, TypeScript

Web Technologies – .NET, Node, RESTful APIs, HTTP, SOAP, MVC

Cloud & AI Infrastructure – Scalability, Reliability, Performance, Production Environments, Azure, Dynamics 365, Microsoft 365, Identity, Microsoft Entra, Teams, OneDrive & SharePoint, Office, Mesh

Development Practices – Design, Architecture, Implementation, Testability, Debugging, Secure Long-Term Support, Mentorship, Quality, Performance, Simplicity, Durability, Scalability, Reusability, Maintainability, AI Tooling, Privacy, Security, Compliance

Frameworks & Tools – Hibernate, JPA, JUnit, Mockito, Maven, Gradle, Docker, AWS, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, PostgreSQL, MySQL, Oracle, Flask, FastAPI, React, Angular, Power BI, Tableau, R / RStudio, DAX, Power Query, scikit-learn

PROJECTS

Enterprise Java Application Modernization

- Re-architected a monolithic Java application into a suite of **microservices** using **Spring Boot**, improving system modularity and enabling independent deployment cycles.
- Integrated **Hibernate** for efficient data access and manipulation, significantly enhancing the performance of core business logic processing for enterprise customers.
- Implemented comprehensive **JUnit** test suites, achieving over 85% code coverage and reducing regressions in production environments by approximately 40%.

Automated Data Ingestion Pipeline

- Developed a **Python**-based ETL pipeline to extract, transform, and load data from multiple legacy systems into a unified data lake on **AWS S3**.
- Engineered data validation checks within the **Python** scripts, reducing data quality issues reported by downstream analytics teams by 30%.
- Scheduled and monitored the data pipeline using **Jenkins**, ensuring reliable and timely data availability for business intelligence reporting.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
