PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed and triaged **P1/P2 incidents** across multiple enterprise applications, restoring service within defined SLAs using **Splunk** and **Dynatrace** for log analysis and root cause identification.
- Developed **Python scripts** to automate data extraction for weekly operational reports, reducing manual effort by approximately 8 hours per week for the financial operations team.
- Executed **SQL queries** against **PostgreSQL** and **Oracle** databases for data validation and ad-hoc reporting requests from business analysts, supporting reconciliation workflows.
- Developed and maintained **Java Spring Boot REST APIs** for internal microservices, implementing new features and resolving defects within the financial-services dashboard codebase.
- Performed security investigations by correlating events across various sources, including IP addresses, usernames, and process names, to identify and mitigate potential threats.
- Analyzed **service logs** and investigated trends to identify potential errors and security anomalies, contributing to the overall reliability of revenue-generating services.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, ensuring consistent environments for development and production.

SKILLS

Security Operations – Security Operations, Incident Management, SIEM, Malware Analysis, Threat Intelligence, Vulnerability Management

Networking – TCP/IP, OSI Model, Network Design Principles

Programming Languages – Java, Python, SQL

Frameworks & Libraries – Spring Boot, pandas, NumPy, scikit-learn

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

Databases – PostgreSQL, MySQL, Oracle

Tools & Technologies – Docker, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace

PROJECTS

Production Incident Response and Automation (HCL Technologies)

- Managed and resolved critical production incidents for a financial-services operations dashboard, ensuring adherence to strict SLAs and audit trail requirements.
- Automated routine data validation tasks using **Python scripting**, reducing the time spent on manual checks by **30%** for the operations support team.
- Developed comprehensive runbooks and troubleshooting guides for common P1/P2 issues, improving the mean time to resolution for the incident response team.

Log Analysis and Threat Correlation (MSc Applied Project)

- Developed a Python-based analysis framework to ingest and correlate security logs from multiple sources for a simulated enterprise environment.
- Applied **SIEM** principles to identify patterns and anomalies, successfully detecting simulated malware intrusions and unauthorized access attempts.
- Generated detailed reports on security events and recommended mitigation strategies, demonstrating strong **deductive reasoning** and analytical capabilities.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
