PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Python** data pipelines for ETL processes, automating data ingestion and transformation for internal reporting systems.
- Designed and implemented **REST APIs** using **Java Spring Boot** to facilitate data exchange between enterprise backend services and client-facing applications.
- Managed production support for enterprise applications on **AWS**, resolving P1/P2 incidents and ensuring SLA adherence through proactive monitoring with **Splunk** and **Dynatrace**.
- Built integration components to communicate with **streaming platforms** and distributed systems, processing approximately 3,500 events per second during peak hours.
- Enhanced **data architecture** components for centralizing data definitions, collaborating with stakeholders to establish data governance principles.
- Implemented distributed workflows and processes to coordinate complex business operations across multiple systems, improving inter-system communication efficiency by an estimated **15%**.
- Containerized backend services using **Docker** and deployed them to an **AWS EKS** cluster, managing configuration and resource allocation for predictable rollouts.

SKILLS

Languages – Python, Java, SQL, R

Frameworks/Libraries – Spring Boot, pandas, NumPy, scikit-learn, Flask, FastAPI

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git

Databases – PostgreSQL, MySQL, Oracle

Tools/Platforms – Kafka, Splunk, Dynatrace, Jira, Confluence

Data Analysis/BI – Power BI, Tableau, DAX, Power Query, Data Modeling

PROJECTS

Distributed Workflow Orchestration Service

- Engineered a **Python**-based service to orchestrate complex, multi-step business processes across disparate systems, improving process completion rates by **22%**.
- Integrated with **Kafka** for asynchronous communication and event-driven processing, ensuring resilient handling of distributed workflows.
- Developed robust error handling and retry mechanisms within the workflow engine, reducing manual intervention by approximately **30%**.

Financial Transaction Data Integration API

- Built a **Java Spring Boot** REST API to ingest and process financial transaction data from various sources, enabling seamless integration for downstream reporting systems.
- Implemented data validation and transformation logic using **JPA** and **PostgreSQL**, ensuring data integrity for over 50,000 records daily.
- Containerized the API using **Docker** and configured basic CI/CD pipelines with **Jenkins** for automated testing and deployment to **AWS EC2**.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
