PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented new features for core **MongoDB products**, focusing on enhancing data structure and algorithm performance, contributing to an improved user experience for **MongoDB deployments**.
- Collaborated with cross-functional teams, including product managers and QA engineers, to define requirements, plan sprints, and deliver high-quality end-user features within an agile development framework.
- Authored and executed comprehensive unit and integration tests for new software features, ensuring code quality and adherence to design specifications, maintaining a **test coverage of over 85%**.
- Participated in technical design discussions and code reviews, providing constructive feedback to peers and junior engineers to uphold coding standards and promote knowledge sharing.
- Developed and maintained **Python scripts** for data pipeline automation and ETL processes, supporting data ingestion and transformation for various internal tools.
- Managed and resolved production incidents for enterprise Java/.NET applications, performing root cause analysis and implementing fixes within strict **SLA targets**.
- Containerized backend services using **Docker** and deployed them to **AWS EC2 instances**, configuring basic resource limits and networking for predictable performance.

SKILLS

Languages – Java, Python, C++, Go, JavaScript, Node.js, Ruby

Cloud Platforms – AWS, Azure, GCP

Databases – MongoDB, PostgreSQL, MySQL, Oracle

Development Tools – Docker, Git, Jenkins, Jira, Confluence, Kubernetes

Core Concepts – Data Structures, Algorithms, Software Design, REST APIs

PROJECTS

Distributed Data Storage System Enhancement

- Engineered enhancements to a distributed storage system's core data structures using **Java**, improving data retrieval efficiency by approximately **18%**.
- Implemented new API endpoints with **Spring Boot** to facilitate seamless data access and integration with downstream services, achieving a p95 latency below **200ms**.
- Wrote extensive **JUnit tests** and integration tests to validate the correctness and performance of the new features, covering over **90% of the codebase**.

Automated Data Ingestion Pipeline

- Developed a **Python**-based ETL pipeline to automate data ingestion from disparate sources into a central data warehouse, processing approximately **50,000 records daily**.
- Integrated the pipeline with cloud services including **AWS S3** for data staging and **AWS Lambda** for event-driven processing, reducing manual data handling by **~35 hours per week**.
- Designed and implemented data validation checks within the pipeline to ensure data integrity and consistency before loading into the target schema.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
