PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, designing and implementing **REST APIs** for internal and external data exchange, handling approximately 4,000 requests per minute.
- Engineered robust **JPA and Hibernate** persistence layers, optimizing database interactions and managing complex object-relational mappings across multiple schemas in **PostgreSQL**.
- Wrote comprehensive **JUnit and Mockito** test suites for critical Java components, achieving over 85% code coverage for new feature development and ensuring system stability.
- Designed and implemented **Python ETL pipelines** to ingest, transform, and load data from disparate sources into a centralized data warehouse, supporting scheduled reporting requirements.
- Containerized applications using **Docker** and managed deployments on **AWS EC2** instances, integrating with **Jenkins** for automated build and deployment pipelines.
- Participated in **Agile Scrum ceremonies**, including sprint planning, daily stand-ups, and retrospectives, contributing to technical estimations and iterative development cycles.
- Managed incident response for production systems using **Splunk** and **Dynatrace**, performing root cause analysis and implementing fixes to maintain service level agreements.

SKILLS

Backend Development – Java, Spring Boot, Spring, Hibernate, JPA, REST APIs, Microservices, JUnit, Mockito, Maven

Data Engineering & Scripting – Python, Pandas, NumPy, SQL, PostgreSQL, MySQL, Oracle, ETL, Data Pipelines

Cloud & DevOps – AWS, EC2, S3, Lambda, CloudWatch, Docker, Jenkins, Git, CI/CD

Observability & Monitoring – Splunk, Dynatrace

Agile & Project Management – Jira, Confluence, Scrum

PROJECTS

Enterprise Java Application Modernization (HCL Technologies)

- Modernized a legacy Java EE application to a **Spring Boot** microservices architecture, introducing **Hibernate** for data persistence and improving system modularity.
- Developed new **RESTful APIs** to expose core business logic, enabling integration with downstream enterprise systems and supporting cross-system data flows.
- Implemented robust error handling and logging mechanisms using **Logback** and integrated with enterprise monitoring tools to ensure stability and rapid issue identification.

Automated Financial Reporting Pipeline (HCL Technologies)

- Built an automated **Python** pipeline to extract, transform, and load financial transaction data from multiple databases into a reporting data mart.
- Developed **SQL** scripts for data validation and reconciliation, ensuring data integrity for critical operational reports used by business analysts.
- Scheduled and monitored pipeline execution using **Cron jobs** on Linux servers, reducing manual reporting effort by approximately 15 hours per week.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
