PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Administered and troubleshoot **Linux systems**, focusing on performance tuning, memory management, and I/O optimization for critical enterprise applications.
- Developed Python scripts to automate data extraction and transformation processes, reducing manual effort by approximately **40%** for recurring reporting tasks.
- Managed production incidents for enterprise applications using **Splunk and Dynatrace**, ensuring adherence to strict SLAs and coordinating P1/P2 issue resolution.
- Designed and implemented REST APIs using **Java Spring Boot** to facilitate seamless data exchange between microservices, improving system interoperability.
- Supported and integrated with enterprise business systems, including ERP modules, managing change control for configuration updates and coordinating UAT across interconnected platforms.
- Collaborated with operations teams to monitor transaction flows and operational alerting for a financial-services dashboard, identifying and triaging failed payment messages.
- Managed containerized applications using **Docker**, deploying services to AWS EC2 instances and configuring basic resource limits for predictable performance.

SKILLS

Database Technologies – MongoDB, PostgreSQL, MySQL, Oracle

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch), Azure, GCP

Operating Systems – Linux, Shell Scripting

Programming Languages – Python, Java, SQL, JavaScript

Frameworks & Libraries – Spring Boot, Node.js, NestJS, React, Pandas, NumPy, scikit-learn

Tools & Technologies – Docker, Kubernetes, Jenkins, Git, Jira, Confluence, Splunk, Dynatrace, Prometheus, Grafana, Terraform, Ansible, DNS, TCP/IP, SSL/TLS

Concepts – Database Administration, Performance Tuning, Security, Networking, Clustering, Storage Management, Backup, Restore, Disaster Recovery, Mission-Critical Systems, Observability, Infrastructure-as-Code, DevOps

PROJECTS

Enterprise Application Performance Monitoring System

- Engineered a Python-based data pipeline to ingest logs from multiple enterprise applications into a centralized monitoring system, processing over **10,000 events per hour**.
- Developed custom dashboards in **Splunk** to visualize key performance indicators and error rates, enabling operations teams to proactively identify and resolve issues.
- Implemented automated alert configurations within the monitoring system, reducing response times for critical P1 incidents by an average of **30%**.

Customer Onboarding Automation for Database Services

- Designed and implemented a **Python** CLI tool to automate the initial setup and configuration of new customer database instances on AWS.
- Integrated the tool with **Jira** for ticket tracking and status updates, providing visibility to customer success managers and reducing manual handoffs by **50%**.
- Developed clear documentation and ran a knowledge-sharing session for the customer onboarding team on using the new automation tooling.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
