PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for enterprise systems, handling approximately **1,500 requests per minute** during peak loads and ensuring consistent data exchange with downstream services.
- Implemented database access layers using **Hibernate** and **JPA** for a core financial services application, optimizing data retrieval and persistence operations across **PostgreSQL** and **Oracle** databases.
- Engineered **JUnit** and **Mockito** test suites for critical Java components, increasing code coverage by **18%** and reducing production defects by identifying logical errors prior to deployment.
- Contributed to daily stand-ups, sprint planning, and technical estimation sessions within an Agile/Scrum framework, collaborating with product owners to refine user stories and prioritize development tasks.
- Participated in code reviews for peer developers, providing constructive feedback on code quality, adherence to architectural standards, and potential performance enhancements for **Java** applications.
- Managed and provisioned **AWS EC2** instances and **S3** buckets for application deployment and data storage, configuring security groups and IAM roles to enforce access control policies.
- Containerized several Java microservices using **Docker**, creating Dockerfiles and building images for local development and staging environments, improving deployment consistency.

SKILLS

Backend Development – Java, Spring Boot, REST APIs, Hibernate, JPA, Microservices, JUnit, Mockito, Maven, Gradle

Databases – SQL, PostgreSQL, MySQL, Oracle, Data Modelling, Data Warehousing

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux, Shell Scripting, CI/CD

Data Analytics & BI – Power BI, Tableau, DAX, Power Query, R, RStudio, pandas, NumPy, scikit-learn, Statistical Analysis, A/B Testing, Time-Series Analysis

Enterprise Systems & Support – ERP Integration Support, Payments Operations Dashboards, Transaction Monitoring, Reconciliation Workflows, Change Management, Incident Response, Splunk, Dynatrace

PROJECTS

Enterprise Java Application Modernization

- Refactored legacy Java modules into a **Spring Boot** microservice architecture, improving system modularity and enabling independent deployment of services.
- Implemented robust data persistence using **Hibernate** and **JPA**, managing complex object-relational mappings and optimizing database interactions with **PostgreSQL**, resulting in a **22%** reduction in query latency.
- Developed comprehensive RESTful APIs to expose service functionalities, ensuring clear contracts and enabling integration with new client applications and internal systems.

Data Analytics and Reporting Dashboard

- Developed interactive dashboards in **Power BI** to visualize key performance indicators for enterprise operations, consolidating data from multiple sources via **Power Query**.
- Designed and implemented **DAX** measures to support complex analytical queries and business logic, providing actionable insights to stakeholders on operational trends.
- Automated report generation and distribution using Python scripting, reducing manual effort by approximately **15 hours per week** and ensuring timely delivery of management information.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
