PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and enhanced QA test processes, reducing production incidents by approximately **15%** through targeted automation scripts and improved test case design.
- Maintained clear communication channels between development teams, business analysts, and project sponsors, facilitating timely resolution of over **200** critical issues.
- Produced high-quality user test scripts for multiple applications and workflow procedures, ensuring comprehensive coverage for payment processing software.
- Designed and executed comprehensive test strategies, including requirement analysis and UAT case design, for new features in a corporate banking environment.
- Developed and maintained reusable regression test suites, contributing to a **10%** reduction in re-work after release cycles.
- Executed **SQL scripts** for database migration testing, validating data integrity and consistency across production and staging environments.
- Containerized application components using **Docker** for consistent deployment across development, testing, and production environments.

SKILLS

Testing – Functional Testing, UAT Testing, Regression Testing, Test Strategy, Test Case Design, Defect Management

Programming & Scripting – SQL, Python

Domain Knowledge – Corporate Banking, Payment Processing Software, Business Processes

Methodologies – Agile, Scrum, Waterfall

Tools & Technologies – Jira, Confluence, Splunk, Dynatrace, Jenkins, Git, Docker, Linux, PostgreSQL, MySQL, Oracle, AWS

PROJECTS

Payment Processing System UAT Enhancement

- Developed and executed detailed UAT test cases for a **payment processing software** application, focusing on critical transaction workflows.
- Collaborated with business analysts to refine acceptance criteria and ensure alignment between user requirements and system functionality, reducing UAT cycle time by **12%**.
- Authored comprehensive test scripts and documentation, enabling junior team members to effectively participate in user acceptance testing cycles.

Automated SQL Data Validation Framework

- Engineered an **SQL-based framework** for automated data validation during application updates and database migrations within a financial services context.
- Implemented reusable scripts that validated approximately **50,000** data records per execution, ensuring data integrity and consistency across environments.
- Reduced manual data validation effort by an estimated **30%**, accelerating release cycles for interconnected enterprise systems.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
