PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Acted as a key liaison between business stakeholders and technical teams, translating complex payment processing requirements into actionable technical specifications for delivery teams.
- Provided content leadership by defining and documenting solutions for client business requirements, ensuring alignment with strategic objectives and technical feasibility.
- Oversaw User Acceptance Testing (UAT) cycles for new payment system features, identifying and resolving technical issues during development and post-implementation phases.
- Analyzed and documented requirements for high and low-value payment transactions, focusing on regulatory impacts and process improvements.
- Developed Python scripts to automate data validation for transaction flows, reducing manual effort by approximately **30%** and improving data accuracy for reporting.
- Managed production incidents for enterprise financial services applications, performing root cause analysis and implementing fixes to meet strict SLAs.
- Containerized Java Spring Boot microservices using **Docker** and deployed them to **AWS EC2** instances, improving deployment consistency and reducing setup time.

SKILLS

Domain Expertise – Banking Domain, Payments Domain, Low and High Value Payments, Regulatory Changes, Solutioning

Technical Skills – SQL, Oracle databases, Payment System Technologies, Microservice Architecture, Scripting

Languages – Java, Python, SQL

Frameworks/Tools – Spring Boot, REST APIs, Docker, Jenkins, Jira, Confluence, Splunk, Dynatrace

Cloud Platforms – AWS (EC2, S3, Lambda, CloudWatch)

PROJECTS

Enterprise Payments Dashboard Enhancement

- Designed and implemented new reporting features for a financial services payments operations dashboard, focusing on transaction monitoring and operational alerting for failed messages.
- Wrote complex SQL queries across PostgreSQL and Oracle databases to extract and aggregate data for reconciliation workflows, supporting audit trail requirements.
- Collaborated with business analysts and operations teams to gather requirements for dashboard enhancements, ensuring delivered solutions met critical business needs.

Automated ERP Data Integration Pipeline

- Developed Python ETL scripts to integrate data between disparate enterprise business systems, including ERP modules and operational platforms, ensuring data consistency.
- Managed change control processes for system configuration updates and coordinated UAT for cross-system integrations, supporting post-go-live stabilization.
- Built REST APIs using Java Spring Boot for seamless data exchange between interconnected systems, facilitating smoother operational workflows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
