PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and implemented **Python** scripts to automate data extraction and transformation for operational reporting, reducing manual effort by approximately **15 hours per week**.
- Developed and maintained **Java Spring Boot** REST APIs for cross-system integrations, ensuring seamless data flow between enterprise applications.
- Managed production support for enterprise applications on **AWS**, responding to P1/P2 incidents and performing root cause analysis using **Splunk** and **Dynatrace**.
- Collaborated with cross-functional teams to gather requirements and support User Acceptance Testing for system configuration updates within an **Agile/Scrum** framework.
- Executed complex **SQL** queries across **PostgreSQL** and **Oracle** databases for data validation and ad-hoc reporting needs.
- Containerized existing microservices using **Docker**, preparing them for deployment to a managed **Kubernetes** environment.
- Prepared technical reports and interpreted hydrogeological data for environmental impact assessments, ensuring compliance with **environmental legislation**.

SKILLS

Hydrogeology – Hydrological impact assessments, Groundwater monitoring programs, WFD assessments, GWDTE assessments, Risk assessments, Site investigation reports, Conceptual site models, Hydrogeological data interpretation

Data Analysis & Reporting – Water quality data analysis, Water quantity data analysis, Data interpretation, Technical reporting, Factual reporting, Interpretative reporting

Engineering & Design – Site investigation data interpretation, Design implementation, Project scoping, Project planning, Project programming, Tender preparation, Fee proposals

Cloud & Containerization – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes

Programming & Scripting – Python, Java, SQL, Spring Boot, REST APIs

Operations & Support – Production support, Incident response, SLA management, Change management, Regulatory submissions, Environmental legislation compliance

PROJECTS

Groundwater Monitoring System Enhancement

- Developed a **Python**-based data ingestion pipeline to process real-time sensor readings from groundwater monitoring wells.
- Implemented automated data validation checks and anomaly detection algorithms within the pipeline to flag potential data quality issues, catching **~85%** of data errors before reporting.
- Designed and documented the architecture for a scalable data storage solution on **AWS S3** for long-term historical trend analysis.

Environmental Impact Assessment Data Aggregation Tool

- Created a **Power BI** dashboard to consolidate and visualize data from various environmental impact assessments, including water quality parameters and hydrological survey results.
- Built reusable **DAX** measures for calculating key environmental indicators and presented interactive reports to project managers and environmental consultants.
- Managed data ETL processes using **Power Query** to clean and transform disparate data sources into a unified analytical model.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
