+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** microservices, designing and implementing **RESTful APIs** for internal and external integrations, supporting approximately 15,000 requests per hour.
- Implemented robust persistence layers using **Hibernate** and **JPA**, optimizing data retrieval and storage operations for enterprise applications, reducing average query times by **18%**.
- Wrote comprehensive unit and integration tests using **JUnit** and **Mockito**, ensuring code quality and maintainability for critical application modules, achieving over **90%** code coverage.
- Collaborated with cross-functional teams to refine technical requirements for new features, contributing to sprint planning and providing accurate effort estimations for development tasks.
- Containerized multiple Java applications using **Docker**, defining multi-stage builds and optimizing image sizes for efficient deployment to cloud environments.
- Managed production incident response for enterprise systems, analyzing logs via **Splunk** and **Dynatrace**, and coordinating P1/P2 issue resolution within strict SLA targets.
- Automated data extraction and transformation processes using **Python** scripting and **pandas**, creating scheduled reports that consolidated operational metrics for management review.

SKILLS

Languages – Java, Python, SQL, R, HTML, JavaScript

Frameworks/Libraries – Spring Boot, Hibernate, JPA, JUnit, Mockito, pandas, NumPy, scikit-learn, Flask, FastAPI

Databases – PostgreSQL, MySQL, Oracle, SQL

Cloud/DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git, Linux

BI/Analytics – Power BI, Tableau, DAX, Power Query, RStudio

Enterprise Systems – ERP, Jira, Confluence, Change Management

PROJECTS

Enterprise Java Application Modernization

- Refactored monolithic Java application components into microservices using **Spring Boot**, improving system modularity and enabling independent scaling of services.
- Integrated a new data processing module using **Hibernate** and **PostgreSQL**, handling approximately **5,000** transaction records daily for a core financial operations dashboard.
- Developed **RESTful APIs** for inter-service communication, ensuring data consistency and efficient request handling across the distributed system.

Automated Production Monitoring & Alerting

- Developed Python scripts to aggregate and analyze logs from multiple enterprise applications using **Splunk** and **CloudWatch**, identifying patterns in recurring incidents.
- Built automated alerting mechanisms that reduced manual monitoring overhead by an estimated **30%**, triggering notifications for critical system events.
- Created standardized runbooks and diagnostic procedures for common production issues, facilitating faster incident response by the operations team.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
