PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Engaged with diverse stakeholders across business, risk, and compliance teams to elicit, document, and validate requirements for **digital identity solutions**, translating them into actionable user stories.
- Analyzed current customer onboarding and identity verification processes, identifying opportunities for **process improvement and automation**, which informed the design of enhanced digital journeys.
- Created detailed **process maps** and functional specifications for **Identity Verification (ID&V) and EU Digital ID frameworks**, ensuring alignment with business objectives and technical feasibility.
- Facilitated cross-functional workshops with IT, Operations, and Risk teams to ensure alignment on requirements and priorities for the **digital identity management domain**, contributing to smoother project delivery.
- Supported the development of comprehensive **test plans** and actively participated in **User Acceptance Testing (UAT)**, capturing and incorporating feedback for solution refinements.
- Ensured documented business requirements and proposed processes aligned with **regulatory obligations** including GDPR and EBA guidelines, maintaining clear audit trails.
- Collaborated with Risk Analysts to assess and mitigate potential risks associated with **digital identity processes** and customer onboarding, ensuring compliance and security.

SKILLS

Business Analysis – Requirements Elicitation, Process Mapping, User Stories, Functional Specifications, UAT, Stakeholder Management, Workshop Facilitation, Documentation

Digital Identity & Compliance – Identity Verification (ID&V), EU Digital ID, GDPR, EBA Guidelines, Regulatory Compliance, Risk Assessment

Tools & Methodologies – Agile Methodologies, Jira, Confluence, Process Mapping Tools

Technical Skills – SQL, Python, Java, Spring Boot, REST APIs, AWS, Docker, Linux

Data & Analytics – Power BI, Tableau, DAX, Power Query, Data Modelling, R, pandas, scikit-learn

PROJECTS

Digital Identity Verification Workflow Optimization

- Designed and documented an optimized workflow for **digital identity verification** processes, reducing manual intervention points by approximately 30% through enhanced automation.
- Collaborated with business analysts and operations teams to map existing customer onboarding journeys and identify key areas for **regulatory compliance** and user experience improvements.
- Developed **SQL queries** for data validation and reporting on verification success rates, supporting analysis for stakeholders on the project team.

Customer Onboarding Process Analysis (MSc Project)

- Analyzed customer onboarding processes for a simulated financial institution, focusing on **Identity and Verification (ID&V)** stages and associated **regulatory requirements**.
- Created detailed **process maps** using Visio to illustrate current state and proposed future state workflows, highlighting potential bottlenecks and compliance gaps.
- Presented findings and recommendations to a panel of academic and industry experts, demonstrating an understanding of **business analysis techniques** and stakeholder engagement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
