PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided technical guidance and system selection support to the sales team for heating, ventilation, and renewable energy systems, ensuring technically accurate quotations and proposals.
- Advised customers, installers, and consultants on appropriate technical solutions, acting as a key pre-sales and post-sales technical contact for complex system designs.
- Reviewed project drawings and specifications to confirm system suitability and compliance, ensuring alignment with customer requirements and best engineering practices.
- Managed inbound technical calls and enquiries, translating complex system functionalities into clear explanations for both technical and non-technical audiences.
- Developed and maintained technical support documentation and training materials for internal teams and external stakeholders on product and system applications.
- Collaborated with internal departments including service, commissioning, and distribution to ensure seamless project execution and client satisfaction.
- Containerized a Python-based technical documentation generation tool with **Docker** and deployed it to an **AWS EC2** instance, improving documentation update efficiency by **30%**.

SKILLS

Technical Support – System Selection, Design Assistance, Technical Guidance, Quotations, Specifications, Proposals, Technical Queries, Problem-Solving

Engineering – Mechanical Engineering, Building Services Engineering, Renewable Energy Systems, Heating Systems, Ventilation Systems

Customer Interaction – Customer Advising, Installer Support, Consultant Liaison, Professional Communication, Technical Explanations

Documentation & Training – Technical Documentation, Training Material Production, System Training, Knowledge Sharing

Software & Cloud – Python, Docker, AWS EC2, Linux Shell Scripting, Git

PROJECTS

Renewable Energy System Design Tool (HCL Technologies)

- Developed a **Python** application to assist in the design and selection of renewable energy systems, integrating product specifications and performance data.
- Built a command-line interface for the tool, allowing users to input project parameters and receive tailored system recommendations with estimated performance metrics.
- Created comprehensive user guides and technical documentation for the design tool, facilitating adoption by sales and engineering teams.

Technical Support Automation with Python (HCL Technologies)

- Automated the generation of standard technical support reports using **Python** scripts, processing data from **SQL** databases (PostgreSQL) and reducing manual effort by **40%**.
- Developed reusable **Python** functions for common data validation tasks, ensuring consistency and accuracy in technical output across multiple support workflows.
- Implemented error handling and logging mechanisms within the automation scripts, improving reliability and traceability of the reporting process.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
