PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Prepared technical sales quotations by analysing architectural drawings and conducting site visits for renewable energy systems.
- Managed and expanded a sales prospect list, engaging with potential clients via telephone and email to address technical queries on heat pumps, biomass boilers, and solar thermal systems.
- Calculated heat load requirements for domestic heating systems, sizing boilers, heat pumps, and radiators in compliance with SEAI grant scheme specifications.
- Provided technical documentation and data sheets to onsite installation crews for ventilation systems and central vacuum units, ensuring adherence to building regulations.
- Coordinated with marketing consultants and website designers to support promotional activities for the company's product portfolio, including solar photovoltaic and heating components.
- Updated the Kanban board for ongoing installation projects, tracking progress and relaying potential scheduling issues to management, clients, and installation crews.
- Managed inventory of materials in the warehouse, tracking items entering and exiting, and liaising with suppliers for internationally procured goods to ensure timely delivery and resolve damages or faults.

SKILLS

Core IT – Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Data Entry, Spreadsheet Management

Technical Sales – Sales Quotations, Prospect Management, Technical Queries, Product Demonstrations, Follow-up

Technical Support – Heat Load Calculations, Boiler Sizing, Heat Pump Specification, Ventilation Systems, SEAI DEAP Software, Central Vacuum Systems

Project Management – Kanban Board, Scheduling, Material Allocation, Installation Coordination, Site Visits

Logistics & Warehouse – Inventory Management, Supplier Liaising, Stock Control, Annual Stock Take

Renewable Energy Systems – Heat Pumps, Biomass Boilers, Solar Thermal, Solar Photovoltaic, Heat Recovery Units, Domestic Plumbing Components

PROJECTS

Renewable Energy System Quotation Tool

- Developed a Python application to automate the generation of sales quotations based on architectural drawing inputs and system specifications.
- Integrated a PostgreSQL database to store product pricing, technical specifications, and customer data for efficient retrieval.
- Designed the user interface using Tkinter, allowing sales staff to input project details and generate accurate, compliant quotes.

Grant Scheme Compliance Dashboard

- Built a Power BI dashboard to track compliance of domestic heating and ventilation systems against current SEAI grant scheme requirements.
- Developed DAX measures to analyse installation data, flagging systems that did not meet regulatory specifications for heat load or ventilation sizing.
- Created interactive visualisations to present compliance status to management and support teams, aiding in process improvement.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
