PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Provided day-to-day support for key business applications, resolving an average of **15-20 tickets** weekly related to user access and application functionality.
- Executed and monitored critical system processes, including daily batch jobs and scheduled reporting tasks, ensuring **98% completion rate**.
- Assisted with system upgrades and patching lifecycles for enterprise applications, contributing to testing and user acceptance testing phases for a new CRM release.
- Managed incident and service request queues, tracking and managing SLAs to ensure timely resolution of issues impacting business operations.
- Developed and maintained system documentation, including **10+ support procedures** and troubleshooting guides for common application issues.
- Performed hands-on hardware support, including building, imaging, and configuring **50+ new laptops** for employee onboarding and hardware refresh cycles.
- Supported root cause analysis for recurring incidents, contributing to continuous service improvement initiatives by identifying and documenting **3 key areas** for process optimization.

SKILLS

Application Support – IT Analyst, End-User Support, Incident Management, Service Request Management, SLA Tracking, Root Cause Analysis, Documentation, Troubleshooting.

Database Tools – SQL Developer, PostgreSQL, MySQL, Oracle.

Networking – Connectivity Troubleshooting, Network Fundamentals.

Cloud Environments – Azure Virtual Desktop, Citrix, AWS (EC2, S3, Lambda, CloudWatch).

Hardware Management – Desktop Imaging, Laptop Configuration, Peripheral Support, Asset Tracking.

Automation – Python Scripting, Power Automate, Workflow Automation.

ERP Systems – ERP Support, Dispatch Systems.

PROJECTS

Enterprise Application Support Enhancement (HCL Technologies)

- Streamlined incident management processes by implementing standardized triage procedures for P1/P2 incidents affecting enterprise applications, reducing average response time by **18%**.
- Developed a Python-based automation script to parse Splunk logs for common error patterns, flagging potential issues for proactive investigation and reducing manual log analysis time by **30%**.
- Collaborated with business analysts to document user requirements and troubleshoot issues for a financial-services operations dashboard, ensuring smooth UAT cycles.

IT Asset and Lifecycle Management System (HCL Technologies)

- Designed and implemented a centralized asset tracking system using Jira and Confluence, cataloging over **500 hardware assets** and associated user assignments.
- Automated the deployment of standard desktop images using shell scripts on Linux-based systems, reducing the setup time for new hires by **40%**.
- Supported change-control management for system configuration updates across interconnected ERP modules, coordinating UAT and post-go-live support.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS
