PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Facilitated requirements gathering workshops with business stakeholders and operations teams to elicit and refine detailed user stories and acceptance criteria for system enhancements, impacting **three key operational workflows**.
- Developed high-quality analysis artefacts including **process maps** and **data flow diagrams** to visually represent current-state and proposed future-state operational processes, supporting cross-functional alignment.
- Collaborated closely with delivery teams and testers throughout the software development lifecycle to ensure feasibility, clarify requirements, and validate solution alignment with business needs.
- Analyzed quantitative and qualitative data to validate business hypotheses, identify operational trends, and support evidence-based recommendations for process improvements, contributing to **decision-making for system upgrades**.
- Supported UAT planning and execution by developing comprehensive test scenarios and actively triaging defects, ensuring delivered solutions met defined acceptance criteria.
- Contributed to the development of training materials and user guidance documentation to enable successful change adoption and support continuous improvement post-implementation.
- Managed change control processes for system configuration updates and coordinated post-go-live support across interconnected enterprise systems, ensuring smooth transitions and adherence to SLAs.

SKILLS

Business Analysis – Requirements Engineering, Process Modelling, Data Analysis, Agile Documentation, Stakeholder Engagement, Workshop Facilitation, User Stories, Acceptance Criteria, Non-Functional Requirements, Business Case Development, UAT Support, Change Adoption

Agile & Methodologies – Agile, Scrum, Kanban, PRINCE2

Data & Analysis – Data-Driven Analysis, Quantitative Data Analysis, Qualitative Data Analysis, Trend Identification, Predictive Modelling

Systems & Integration – System Interactions, System Integrations, Architectural Considerations

Tools & Technologies – Jira, Confluence, Power BI, Tableau, SQL, Python, Java, Spring Boot, REST APIs, AWS, Docker, Linux

PROJECTS

Enterprise Systems Integration Analysis

- Analyzed and documented data flows and integration points between core ERP modules and a financial services operations dashboard, identifying **bottlenecks in reconciliation workflows**.
- Developed detailed requirements specifications for API-level integrations between disparate enterprise systems, ensuring seamless data exchange and reducing manual data entry by an estimated **15%**.
- Mapped existing business processes and proposed optimized workflows using **Visio** and **Confluence**, facilitating clear communication with business analysts and development teams.

Financial Operations Dashboard Enhancement

- Gathered requirements from operations teams for enhancements to a financial services dashboard focused on transaction monitoring and alerting for failed payment messages.
- Produced user stories and acceptance criteria for new dashboard features, working closely with the development team to translate business needs into technical specifications.
- Supported UAT for the enhanced dashboard, creating test cases and triaging defects to ensure accurate and timely operational alerting for critical payment flows.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

**B.E. Computer Science — SNS College of Technology, Coimbatore,
India**

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
