

HARIRAMAKRRISHNAN RAMACHANDRAN

+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained **Java Spring Boot** REST APIs for core platform services, handling approximately **1,500 requests per second** during peak hours.
- Implemented efficient data persistence layers using **Hibernate** and PostgreSQL, ensuring data integrity across multiple enterprise applications.
- Designed and executed unit tests for Java applications using **JUnit** and Mockito, achieving an average code coverage of **85%** for new feature development.
- Contributed to the design and implementation of application features by collaborating with senior engineers and technical leads in sprint planning sessions.
- Participated in rigorous **code reviews**, providing constructive feedback and learning engineering best practices from senior team members.
- Wrote clean, maintainable, and well-tested code in **Python**, including scripting for data pipelines and automation tasks.
- Containerized several backend services using **Docker** and deployed them to development environments, improving consistency and reducing setup time.

SKILLS

Backend Languages – Python, Java

Frameworks & Libraries – Spring Boot, Hibernate, JUnit, Mockito, pandas, NumPy, Flask, FastAPI, scikit-learn

Databases – PostgreSQL, MySQL, Oracle, SQL

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Tools & Methodologies – REST APIs, CI/CD, Agile, Scrum, Jira, Confluence, Linux, Shell Scripting

PROJECTS

Java Spring Boot Microservices for Workflow Orchestration

- Developed a suite of **Java Spring Boot** microservices to manage and orchestrate complex enterprise workflows, integrating with existing legacy systems.
- Implemented robust error handling and retry mechanisms using **JPA** and PostgreSQL, ensuring high reliability for critical business processes.
- Designed and implemented RESTful APIs for inter-service communication, facilitating seamless data exchange and reducing system coupling.

Python Data Pipeline for Operational Reporting

- Engineered a **Python** data pipeline using pandas and SQL to extract, transform, and load data from multiple sources for daily operational reports.
- Automated report generation and distribution using scheduled Python scripts and shell commands on a Linux environment, reducing manual effort by **~90%**.
- Collaborated with operations teams to gather requirements and refine the data models, ensuring reports accurately reflected key performance indicators.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
