PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and shipped **Java Spring Boot REST APIs** for cross-service data exchange, implementing request validation and circuit-breaker patterns to ensure service resilience.
- Engineered **Python data pipelines** on AWS Lambda and S3 to process approximately 3,500 events per second during peak hours, replacing a less efficient scheduled-batch job.
- Designed and implemented **Hibernate/JPA persistence layers** for enterprise Java applications, managing complex relational data models and ensuring data integrity across multiple modules.
- Containerized microservices using **Docker** and deployed them to an **AWS EKS** cluster, configuring Helm charts and resource limits for predictable performance and easier rollouts.
- Collaborated with enterprise clients during technical onboarding for an internal ML platform, gathering feature-pipeline requirements and translating them into actionable **Python** implementations.
- Wrote comprehensive production runbooks and internal documentation that reduced customer onboarding time from over 4 weeks to approximately 10 days.
- Executed rigorous code reviews for peer developers on a Java/Spring Boot project, ensuring adherence to coding standards and improving overall code quality by **15%** based on internal metrics.

SKILLS

Languages – Java, Python, SQL, R, English, Dutch

Frameworks & Libraries – Spring Boot, Hibernate, JPA, pandas, NumPy, scikit-learn, Flask, FastAPI, Node.js, NestJS

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Kubernetes, Jenkins, Git, Terraform, Helm

Databases – PostgreSQL, MySQL, Oracle, SQL Server

Tools & Platforms – Jira, Confluence, Splunk, Dynatrace, Power BI, Tableau, RStudio

Methodologies – Agile, Scrum, CI/CD

PROJECTS

Customer Onboarding Playbook for ML Feature Store

- Partnered with two pilot enterprise customers to design and deliver a guided onboarding flow for an internal ML feature store, including SDK examples and debug tooling.
- Developed a **Python CLI** tool to validate customer feature definitions against the platform schema pre-submission, reducing upstream errors by **70%**.
- Conducted technical workshops for customer data science teams, upskilling their engineers on platform integration patterns and best practices.

Transaction Anomaly Detection Model with Python

- Engineered a feature extraction pipeline using **Python** and **SQL** on a 1.1M-record transaction log, creating behavioural signals for fraud analysis.
- Trained a **LightGBM classifier** on extracted features to identify anomalous transactions, achieving an **AUC of 0.91** and F1 score of 0.46 on a 1:140 imbalanced dataset.
- Deployed the trained model behind a **FastAPI** inference endpoint, achieving p95 latencies around **180ms** with input validation and feature drift logging.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
