PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Designed and developed **Power BI dashboards** for business-wide consumption, incorporating **DAX measures** and **Power Query** for data transformation and analysis, resulting in enhanced reporting capabilities.
- Owned and enhanced the **centralized data lake**, improving its structure to better support **reporting, analytics, and Management Information (MI)** needs across the organization.
- Served as a subject matter expert (SME) on **data-related subjects**, providing guidance and support to various business units on data architecture and utilization strategies.
- Developed and maintained **Java Spring Boot REST APIs** for cross-service communication, ensuring efficient data exchange and integration between enterprise systems.
- Automated operational tasks and data pipelines using **Python scripting**, reducing manual effort and improving data processing efficiency for scheduled reporting and ETL workflows.
- Managed production support for enterprise applications, including **SLA management** and **P1/P2 incident response** using tools like **Splunk** and **Dynatrace**.
- Containerized applications using **Docker** and deployed them to **AWS EC2 instances**, streamlining the deployment process and improving application portability.

PROJECTS

Enterprise Data Lake Enhancement for BI

- Architected and implemented enhancements to an enterprise **data lake** to improve data ingestion and accessibility for BI teams.
- Developed **ETL processes** using Python and SQL to consolidate data from disparate sources, making it ready for analysis and reporting.
- Designed and deployed a suite of **Power BI dashboards** to visualize key performance indicators derived from the enhanced data lake, enabling data-driven decision-making for business stakeholders.

Financial Operations Dashboard Automation

- Developed automation scripts in **Python** to streamline the process of extracting, transforming, and loading transaction data for operational monitoring.
- Built and maintained **SQL queries** to validate data integrity and reconcile transaction flows within the financial operations dashboard.
- Collaborated with business analysts to refine reporting requirements, ensuring the automated data feeds accurately supported **transaction monitoring** and reconciliation workflows.
