PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Managed daily cash square-ups and confirmed Treasury payments, executing internal funding and derivatives trades with a focus on meeting payment cut-off times.
- Administered vendor details, addressed business queries, and performed statement reconciliations on the vendor ledger, ensuring accurate financial data.
- Provided ad hoc cash and liquidity reporting and analysis to the EVP Treasury, supporting strategic financial planning and decision-making.
- Developed Python scripts to automate the entry of vendor payments into the finance system and generate remittance advices, reducing manual processing time by ~40%.
- Collaborated with business units to resolve queries related to cost allocations and postings from invoices and corporate credit cards, improving financial accuracy.
- Supported corporate finance deal teams in managing third-party and shareholder debt facilities, ensuring compliance with SMBC AC and shareholder policies.
- Containerized Java Spring Boot applications for the Treasury Management System using **Docker**, improving deployment consistency across development and production environments.

SKILLS

Finance & Treasury – Payments, Treasury Risk Management, Liquidity Management, External Payments, Cash Management, Funding Initiatives, Vendor Payments, Loan Facilities, Derivatives

Financial Systems – Treasury Management System (TMS), Finance System, Ledger Systems, Accounting Systems

Programming & Scripting – Python, Java, Spring Boot, SQL

Cloud & DevOps – AWS, Docker, Jenkins, Git

Data Analysis & Reporting – Power BI, DAX, Data Modelling, Reporting, Data Analysis, Ad Hoc Reporting

Core Finance – Accounts Payable, Budget Data, Vendor Ledger, Statement Reconciliation, Cost Allocation

PROJECTS

Treasury Management System Enhancement (HCL Technologies)

- Developed Java Spring Boot microservices to manage deal capture for derivatives and execute internal funding trades within the Treasury Management System.
- Implemented RESTful APIs for seamless integration with the finance system, automating the entry of vendor payments and remittance advice generation.
- Wrote SQL scripts for data validation and reconciliation between the Treasury Management System and the vendor ledger, ensuring data integrity for ~1500 vendor accounts.

Automated Payment Reconciliation Dashboard (MSc Data Analytics Project)

- Designed and built an interactive Power BI dashboard to monitor and reconcile daily Treasury and Accounts Payable payments against bank account funding levels.
- Developed DAX measures to calculate payment timeliness, funding gaps, and identify discrepancies, providing actionable insights to the Treasury function.
- Extracted and transformed payment data from multiple sources using Power Query, creating a robust data model for reporting and analysis, covering over 5,000 payment transactions weekly.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
