+353 89 970 6156 • hariramakrrish@gmail.com • Dublin, Ireland • Stamp 1G — Full-Time Work Eligible

PROFESSIONAL EXPERIENCE

Software Engineer — HCL Technologies, Chennai, India

Sep 2021 – Jan 2025

- Developed and maintained Python-based backend services for a large-scale consumer platform, focusing on data processing and system performance.
- Designed and managed database schemas in **PostgreSQL** to support reliable data storage and retrieval for high-traffic web applications.
- Wrote and optimized **SQL** queries, improving database performance for analytical reporting and background data movement tasks.
- Built background processing jobs and automated workflows using Python to handle system tasks and data synchronization, reducing manual intervention by approximately **30%**.
- Created **APIs** and backend functionality in Python to support user-facing features and integrate with marketing and operations systems.
- Investigated and resolved production issues in a timely manner, contributing to the overall reliability and maintainability of cloud-hosted systems.
- Containerised backend services using **Docker** and deployed them to a cloud-hosted environment (**AWS EC2**), ensuring scalable and maintainable infrastructure.

SKILLS

Languages – Python, SQL, Java

Databases – PostgreSQL, MySQL, Oracle

Cloud & DevOps – AWS (EC2, S3, Lambda, CloudWatch), Docker, Jenkins, Git

Frameworks & Libraries – Spring Boot, pandas, NumPy, Flask, FastAPI

Tools & Methodologies – Jira, Confluence, Agile, REST APIs, Data Pipelines, AI-assisted development tools

PROJECTS

Python Data Processing Pipeline for Consumer Platform

- Engineered a Python data pipeline to ingest and process user activity data from various sources for real-time analytics and reporting, handling approximately **4,500 events per minute**.
- Developed asynchronous background jobs using **asyncio** to manage data transformations and enrichments, improving processing efficiency and reducing latency.
- Integrated the pipeline with **PostgreSQL** for data storage and retrieval, ensuring data integrity and supporting downstream reporting requirements.

API Development for Platform Feature Integration

- Designed and implemented **RESTful APIs** using Python (Flask) to support new user-facing features and integrate with internal marketing tools.
- Collaborated with stakeholders to gather requirements and translate business needs into technical solutions, ensuring seamless integration with existing systems.
- Wrote unit tests using **pytest** to ensure API functionality and reliability, achieving over **85% code coverage** for critical endpoints.

EDUCATION

M.Sc. Data Analytics — National College of Ireland, Dublin

Feb 2026

B.E. Computer Science — SNS College of Technology, Coimbatore, India

2021

CERTIFICATIONS

- IELTS Academic: Overall Band Score **7 out of 9**, issued by IELTS Official, Test Date: 28/AUG/2023
- **Full Stack: Java Spring Boot** and Angular (Great Learning)
- Certificate of Completion in Web Development from **University of California**, Davis (Coursera)
- Certificate of Completion in Python programming from **University of Michigan** (Coursera)
